

TEJAS NETWORKS
ANALYST DAY- MAY 31, 2019

Corporate Overview

Safe Harbor Statement

Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, our ability to successfully implement our strategy and our growth and expansion plans, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on our business activities or investments, changes in the laws and regulations that apply to the industry in which the Company operates. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company.

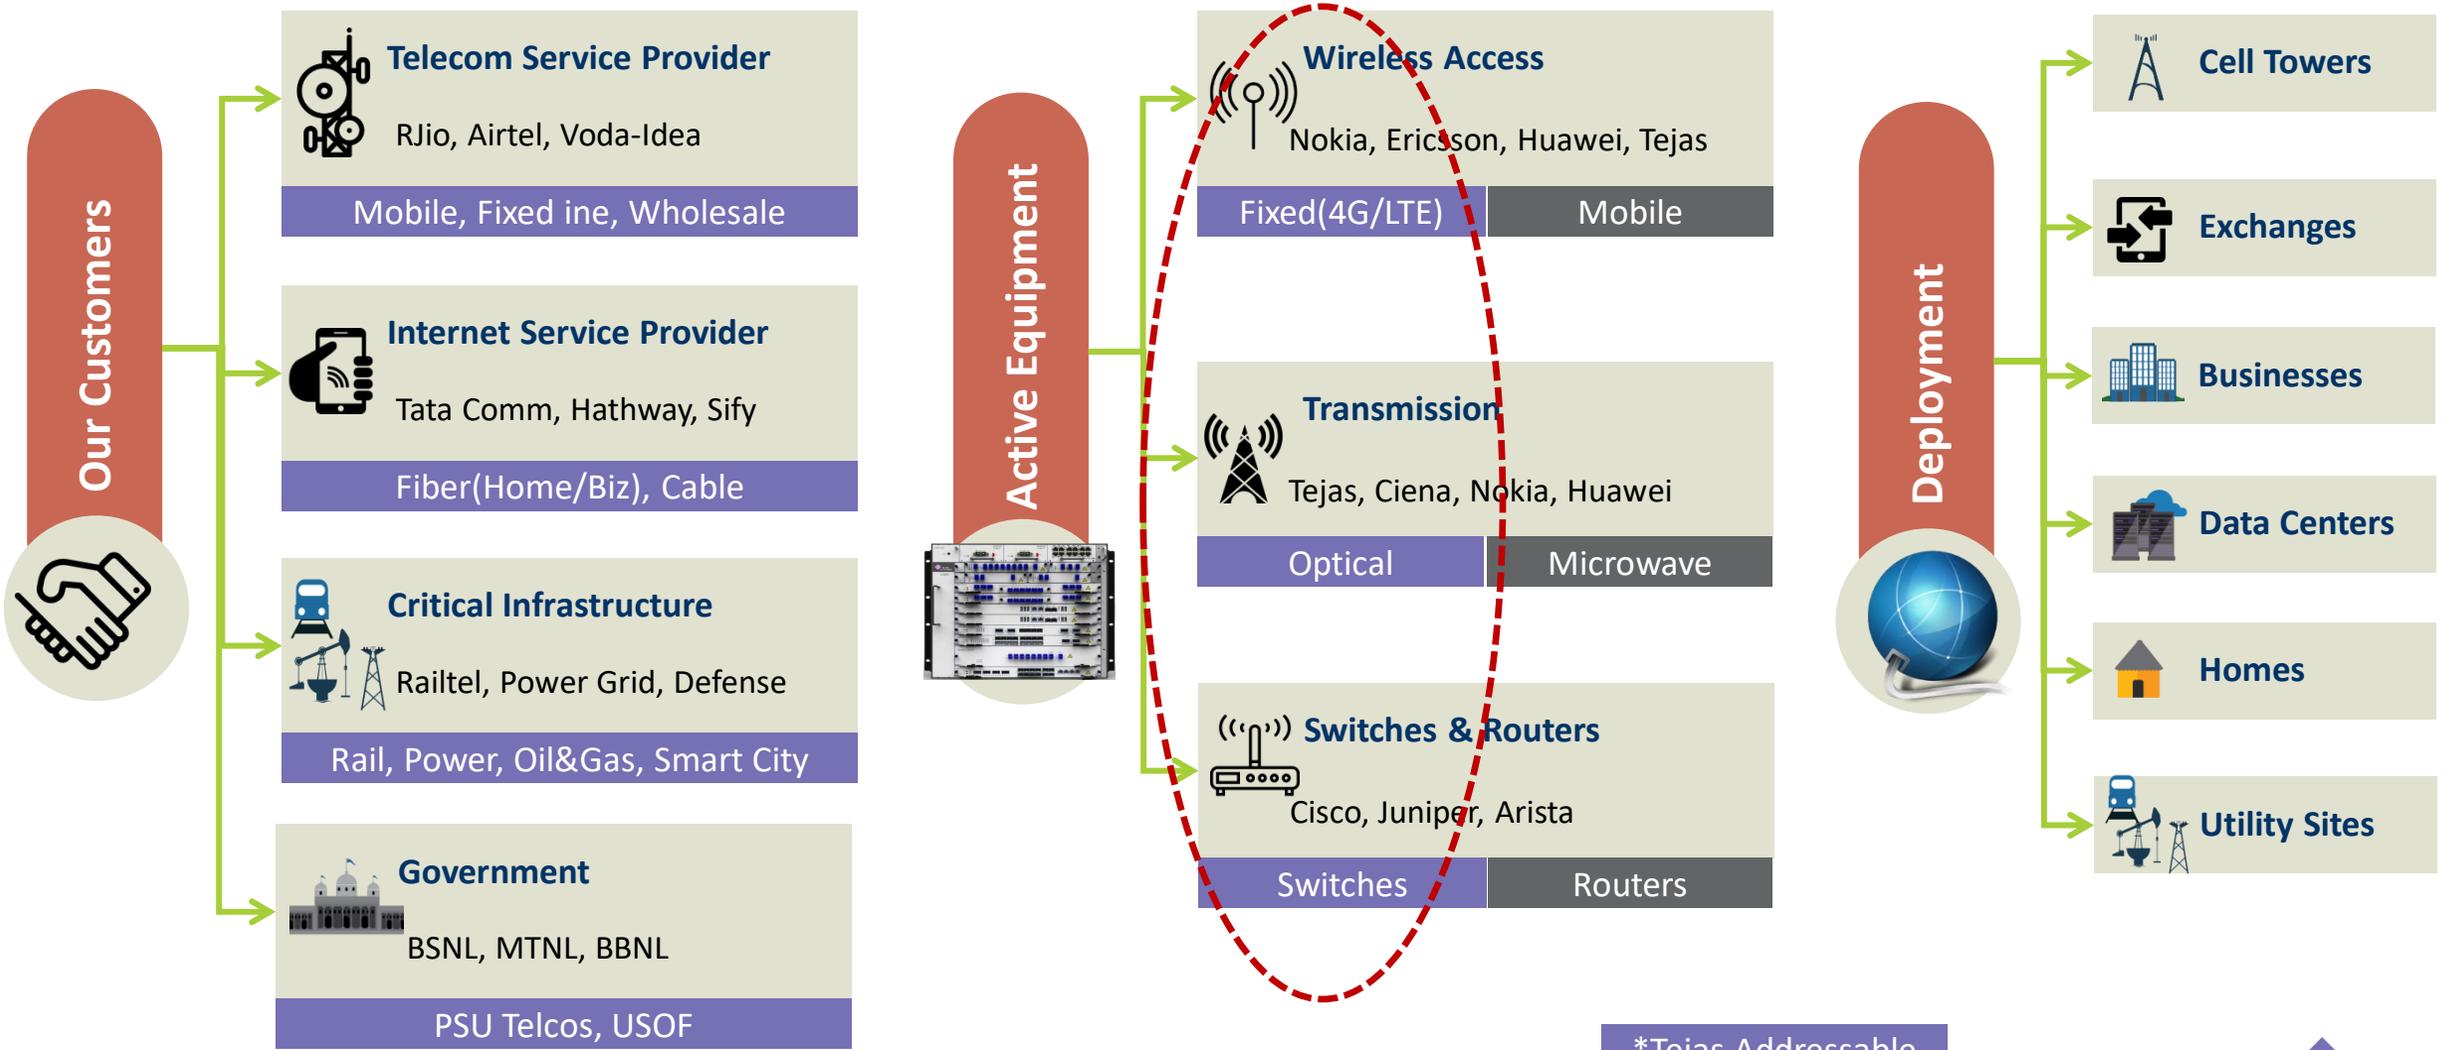

Tejas Networks: A Snapshot

- Founded in year 2000 in Bangalore; Offices in 10+ countries; 750+ employees
- Design and Manufacturer of optical & data networking equipment that is used by telecom service providers and utility companies
 - Optical: High-capacity Optical transmission and Broadband Access for fiber
 - Wireless: LTE-based wireless broadband access
 - Switches: Ethernet switches used for building critical infrastructure
- Technology differentiation: “Software-defined Hardware”
 - Innovative use of programmable silicon; time-to-market and cost advantage
 - Award-winning products- recognition at international forums
 - World-class talent. More than 50% team in R&D
- Innovative business model- growth + profitability in a tough industry
 - Leveraging Indian R&D costs to have 4X R&D efficiency
 - Debt-free and Profitable; Focus on Innovation + Quality + Cost
 - FY19 Net Revenues of Rs 878 Cr (+18.5% YoY); 41.5% YoY PBT Growth
- Success in world’s most competitive telecom market leading to global expansion
 - #1 in Optical aggregation in India; Top-10 globally (Source: Ovum)
 - Customers in 75+ countries; Increasing number of wins in Tier-1 operators
 - Focus on high-growth markets- India, SE Asia, Africa, Americas

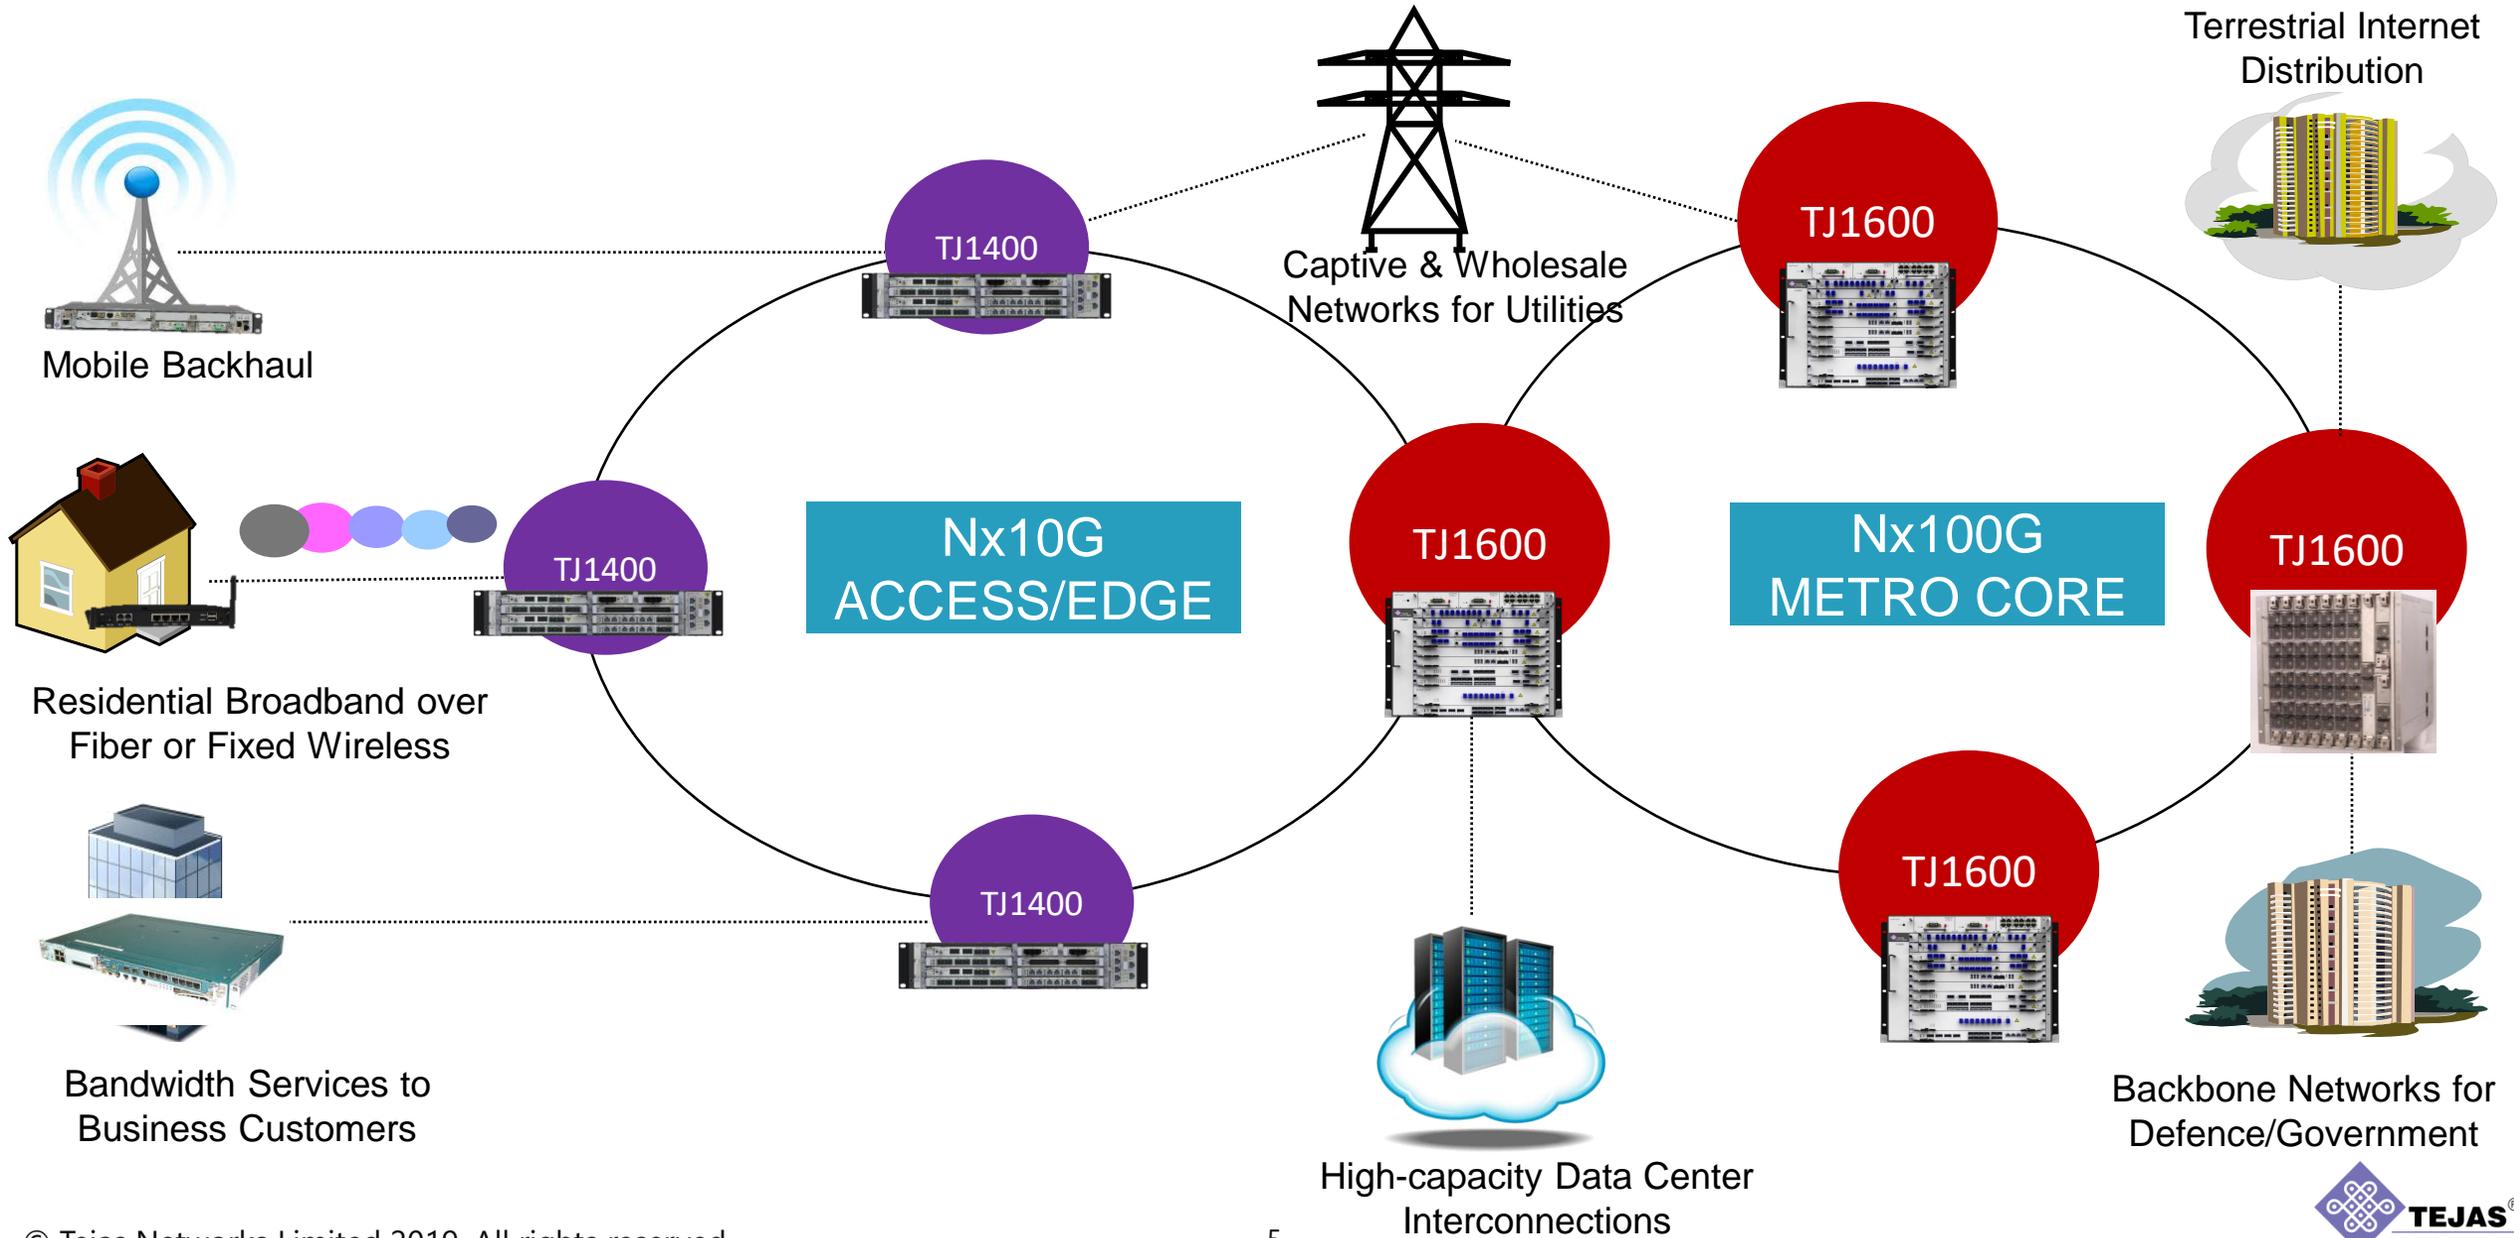

**1st Deep-technology
Indian startup to do
IPO**

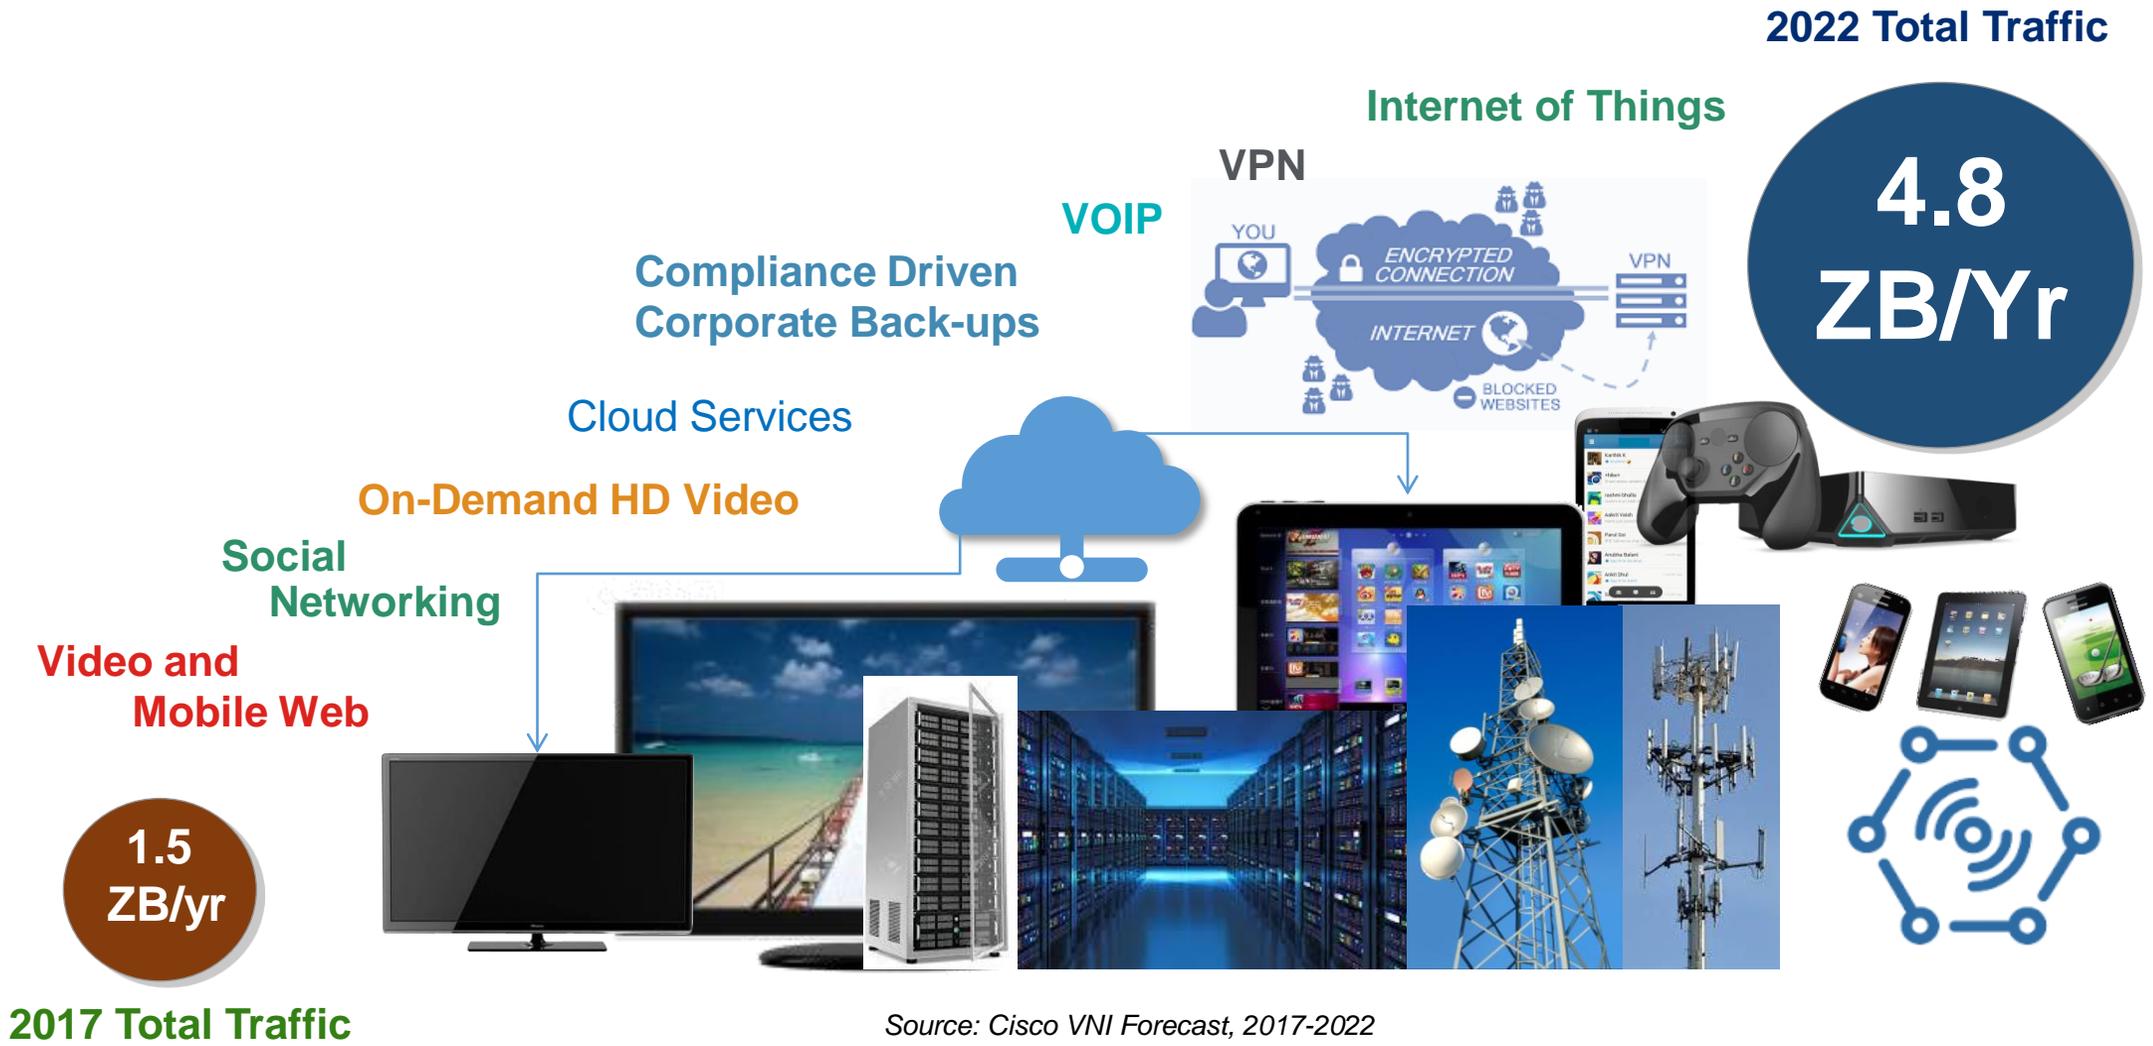

Telecom Industry Eco-system : Where we Fit

We Enable High-capacity Data Networks

Macro trends driving Data Growth and our Business

Emerging Technologies to address Data Growth

FIXED BROADBAND

Multi-gigabit Access on Optical Fiber (FTTX) and Broadband Wireless (WTTX)

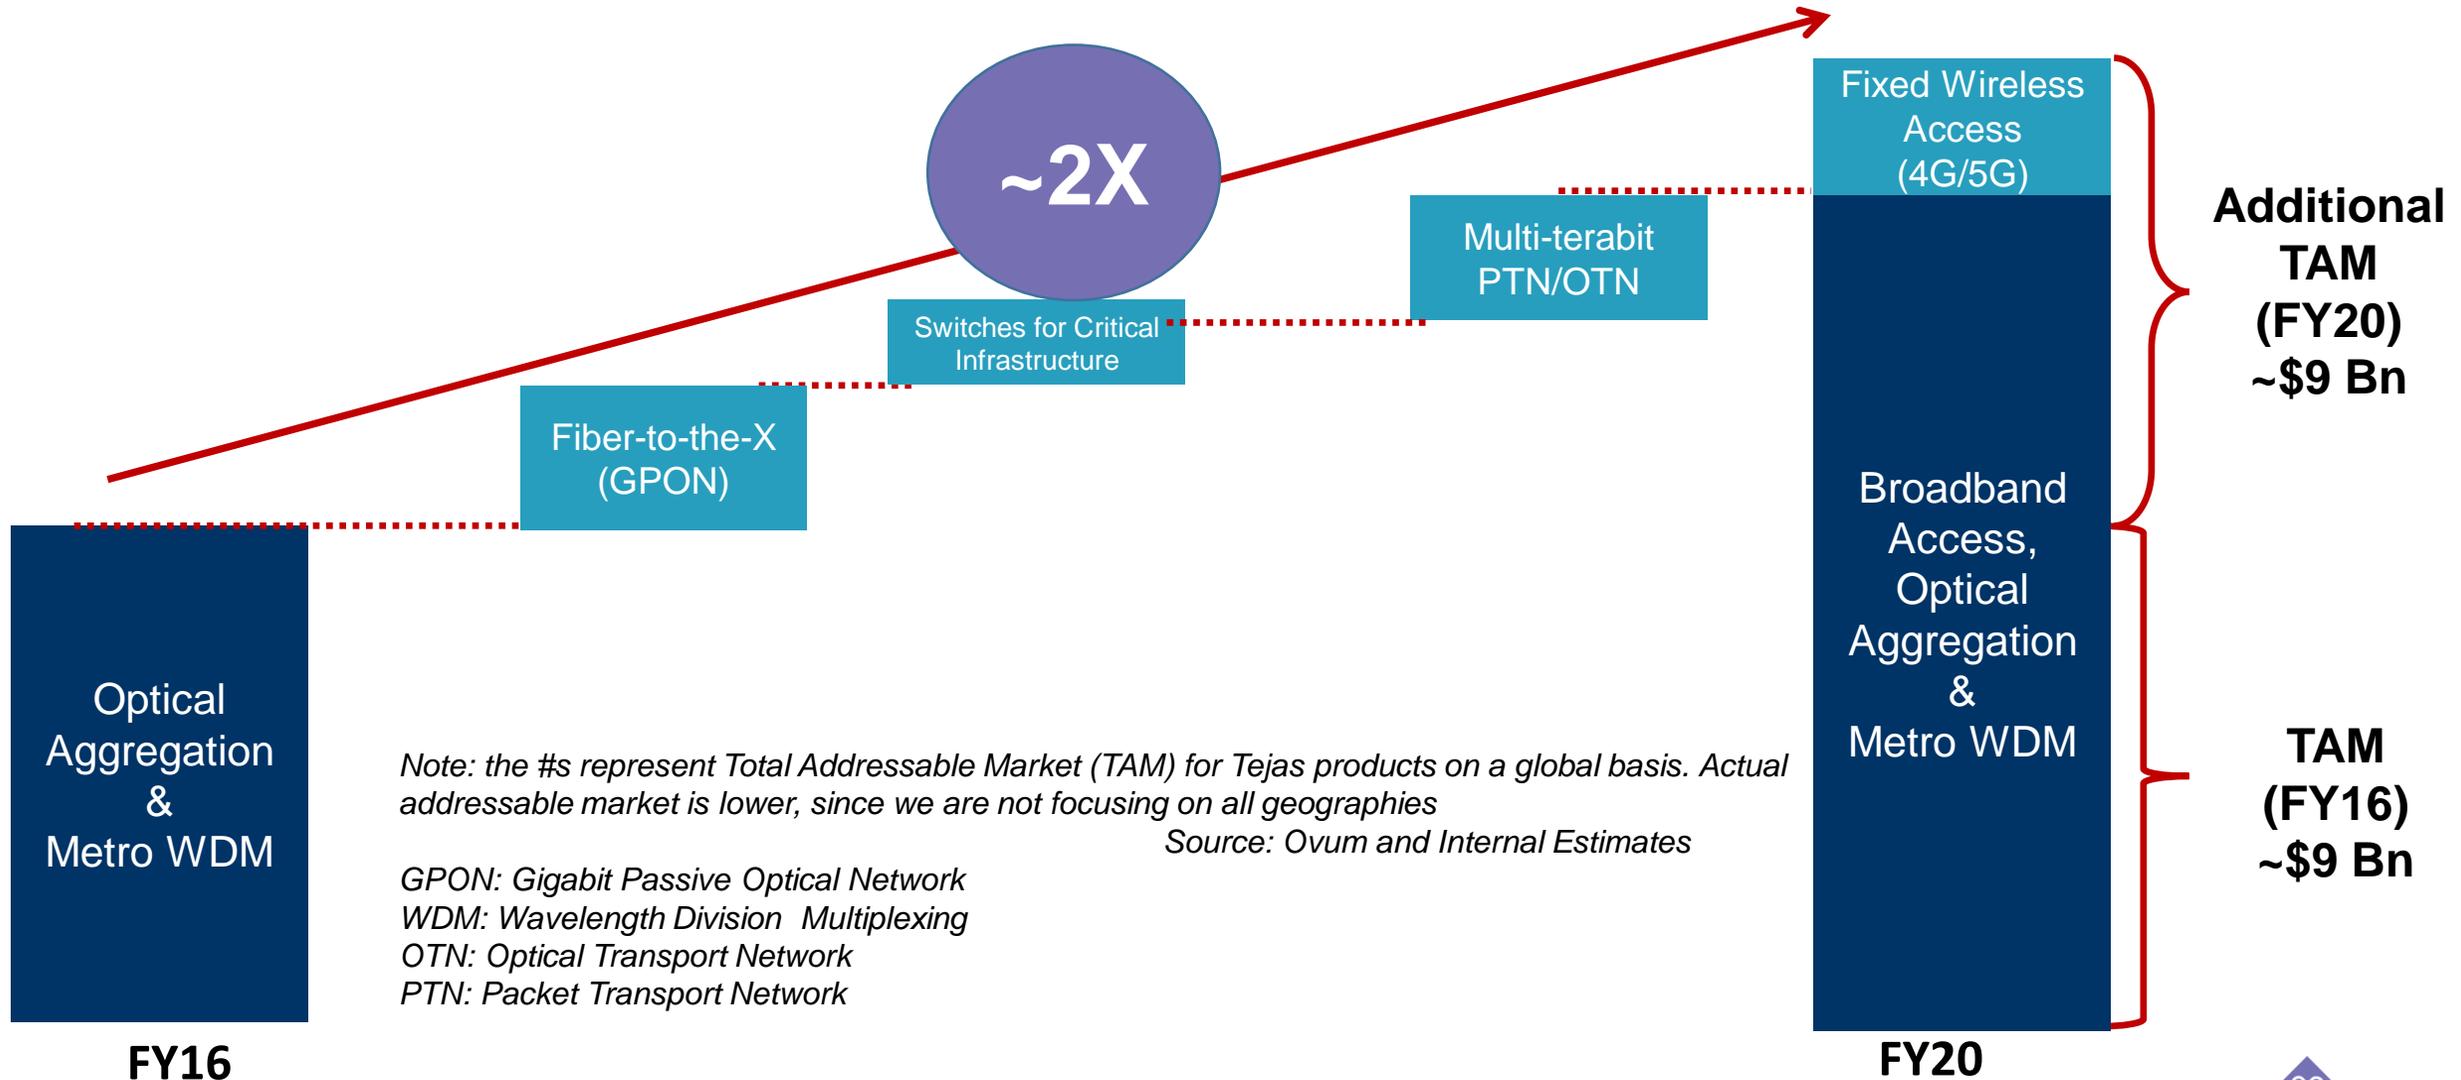

4G, 5G & IOT

Network Densification and Fiberization driving growth in Metro Networks

CLOUD, DATA CENTER

Demand for Massively Scalable DWDM Networks with Multi-terabit Switching

R&D Investments increasing our Addressable Market

Investing in Sales to Expand our Global Footprint

Total Addressable Market (TAM) of ~\$9 billion

Deployment in 75+ Countries

Large installed base 475,000+ deployed

Focus on fastest-growing regions

25+ Tier-1 Customers

Our Sustainable Competitive Advantage

Software-defined Hardware™

Programmable silicon eases feature upgrades, quicker incorporation of new standards and protocols

Future Ready Products

Support multiple technology generations from same platform (2G/3G → 4G/5G)

Ultra Converged Broadband Access/Edge

Flexibility to offer different services on fiber/copper/wireless using relevant technologies

Innovative Business Model

Cost-efficient India-based R&D and low operating costs and asset-light manufacturing delivers superior financial performance

Reputed Board & Strong Corporate Governance

Balakrishnan V.
Non-Executive, Independent Director and Chairman
Founder and Chairman of Exfinity Venture Partners
Ex-Group CFO and Board member of Infosys

Leela Krishnamurthy Ponappa
Non-Executive Director, Independent Director
Indian Foreign Service Officer
Ex-Ambassador of India to Thailand and Netherlands

C.B. Bhave
Non-Executive Director, Independent Director
Chairman, SEBI (2008 -2011)
Chairman and MD, NSDL (1996-2008)
IAS (1975 Batch)

Sanjay Nayak
CEO and Managing Director
30+ years experience in telecom/electronics
Ex-Managing Director at Synopsys
Fellow INAE, Member-FICCI Startup Council
CII National Committee on ICTE; Ex Co-Chairman of Telecom Export Promotion Council. MS, Univ of North Carolina

Dr. Gururaj Deshpande
Non-Executive Director
President & Chairman of Sparta Group LLC
PhD, Queens University, Canada
Life-Member of the MIT Corporation
Founder of Deshpande Foundation

Arnob Roy
COO and Whole-time Director
30+ years experience in telecom/electronics
Ex-Manager, R&D, Synopsys
Master's Degree, University of Nebraska
Bachelor of Technology, IIT, Kharagpur

Senior Management Team: Global Industry Experience

Sanjay Nayak

Chief Executive Officer and Managing Director
30+ years experience in telecom/electronics
Ex-Managing Director at Synopsys
Fellow INAE, Member-FICCI Startup Committee & National Committee on ICTE

Kumar N. Sivarajan

Chief Technology Officer
Associate Professor, IISc, Bangalore
Former Chairperson, Telecom Standards Development Society
Ph.D., California Institute of Technology

Shirish Purohit

Head-Sales (India and Emerging Markets)
25+ years experience in telecom
Ex-CEO and Founder of Midas Communications
M.Tech from IIT Madras, B.E from REC, Nagpur

Arnob Roy

Chief Operating Officer and Whole-time Director
30+ years experience in telecom/electronics
Ex-Manager, R&D, Synopsys
Master's Degree, University of Nebraska
Bachelor of Technology, IIT, Kharagpur

Venkatesh Gadiyar

Chief Financial Officer
Ex-Assistant Financial Controller, Infosys
Fellow Member, Institute of Chartered Accountants of India

Ranajit Hajra

EVP, Global Services Group
Former Regional Director, Global Delivery at Nokia
27 years experience incl. at Nokia, AT&T, Philips and Tata Group

Sukhvinder Kumar

President, Global Manufacturing Operations
Ex-CEO and Managing Director, Eolane Electronics
Advanced Management Program, IIM, Bangalore

N.R. Ravikrishnan

General Counsel and Chief Compliance Officer
Ex-Company Secy and Head Compliance, Infosys
30+ years of experience in Tata, Infosys and TVS

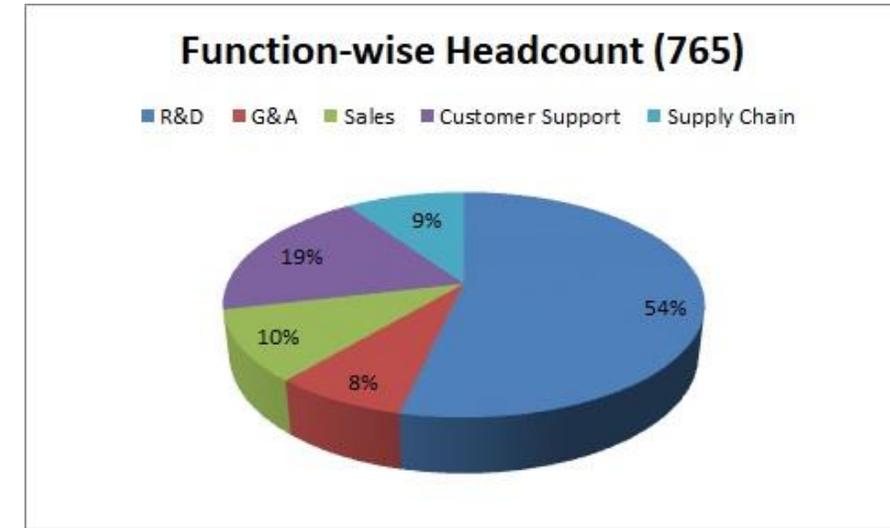

Abhijat Mitra

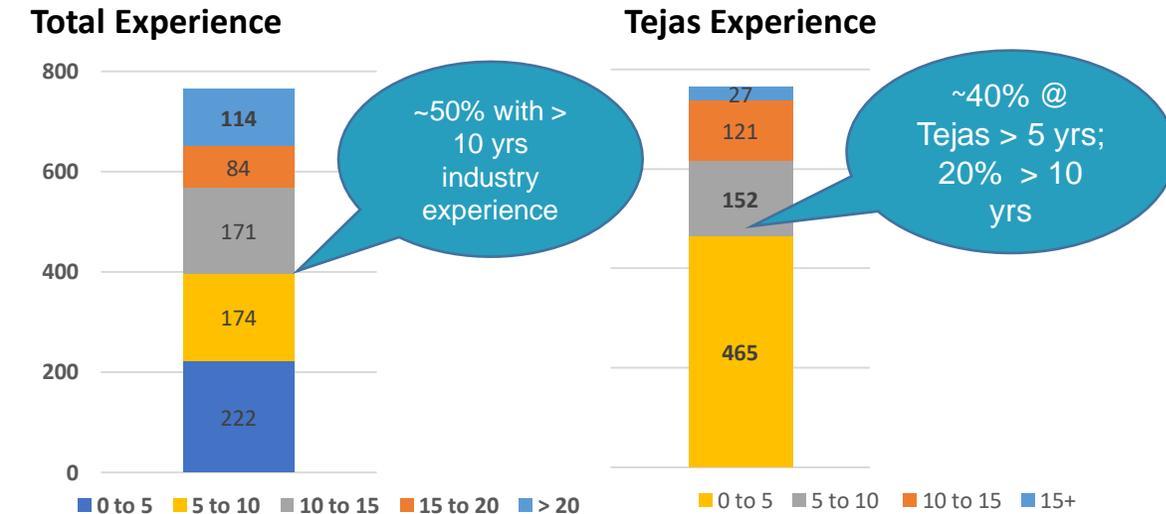

Chief Human Resources Officer (CHRO)
Former HR Head of McKinsey Knowledge Center
MBA from IIM Indore

World-class Team

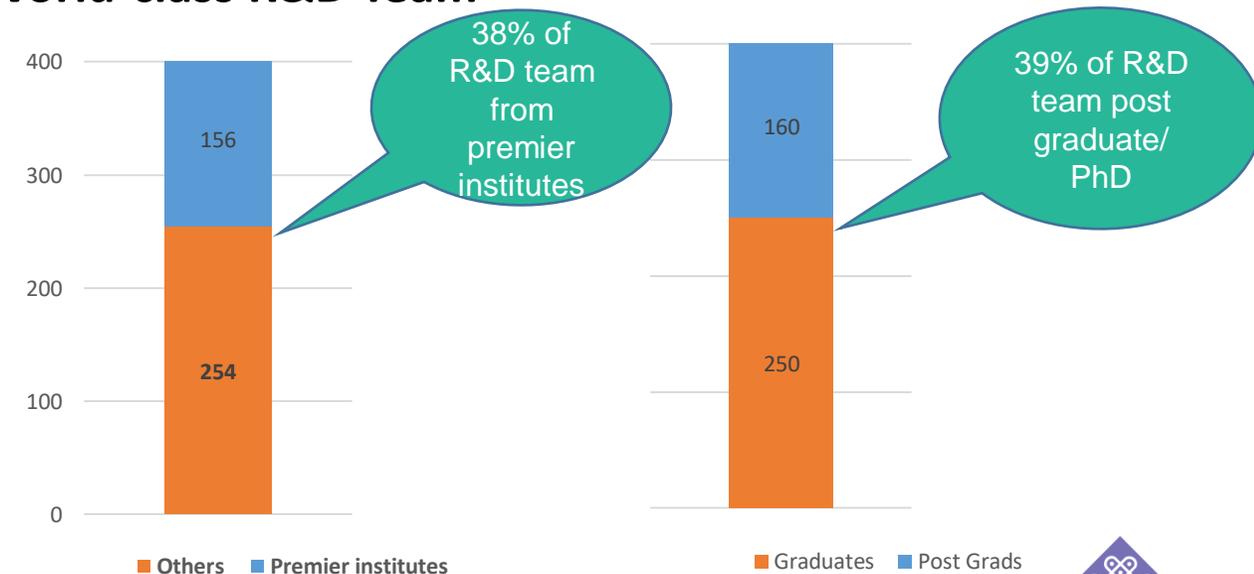

- Highly experienced Senior Sales Team
 - Average industry experience: 22.5 years
 - Average experience at Tejas: 8.7 years
- Highly experienced Senior R&D Team
 - Average industry experience: 24 years
 - Average experience at Tejas: 11.7 years

Retaining Top Talent in a Competitive Industry

World-class R&D Team

Widely Recognized for Innovation and R&D

2018-2019

5

Best Equipment Supply Partner by Gol

FT1000 high-growth list for Asia-Pacific

Aegis Graham Bell award in "Digital India Initiative"

"Best Exporter" award in Gold Category by FKCCI

Finalist at Broadband World Forum Awards, Germany

Finalist at Leading Lights Award, USA

4

2016-2017

300+ patents filed

IESA Most Innovative Product Award in 2016

President of India award for successful commercialization of indigenous innovation in 2016

National Intellectual Property Award by Minister of Commerce and Industry in 2017

3

2012-2015

200+ patents filed

CSIR Diamond Jubilee award from PM in 2012

2

2009-2012

100+ patents filed

Technology and Innovation awards from

- NASSCOM
- Economic Times
- Aegis Graham Bell
- TCOE India

HARVARD BUSINESS SCHOOL

Case Study

2000-2008

1

17 patents filed

CSIR Diamond Jubilee award from PM in 2006

Global Deloitte Technology Fast-50

Red Herring Top-100 Asia

Medium-term Strategy

1

Leverage incumbency in India to benefit from pent-up demand for broadband and data; increase depth in India-private accounts so as to reduce dependence on lumpy, India-Govt business

2

Increase international sales in Africa, S. East Asia and America, to reach 50% of overall revenues

3

Continue to invest in R&D to maintain our product differentiation & expand our portfolio to increase our addressable market

4

Continue to deliver strong financial performance- maintain profitable growth and improve working capital efficiency

Financial Model

Unique Business Model- Profitable in a Challenging Global Industry

Strengths of Tejas Business Model

Use of mass-market FPGA devices,
Ownership of silicon IPR,
Outsourced “Asset-light” Manuf. to
EMS companies in India

Majority of our costs are on manpower,
which are India-based
Strong software skills from India

Sales Focus on fewer, but high growth and
large potential markets;
Effective use of India for back-end support
activities

Sustainable financial performance

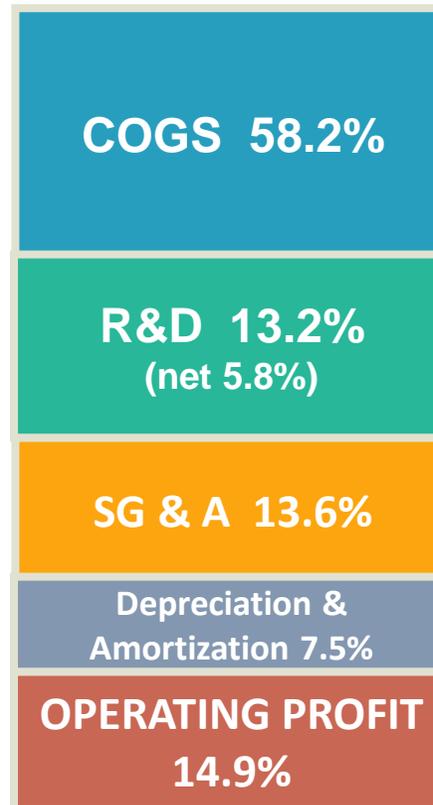

Advantage against Global Peers

Tejas Gross Margins are close to those of
global peers, despite lower economies of
scale and large proportion of India
revenues

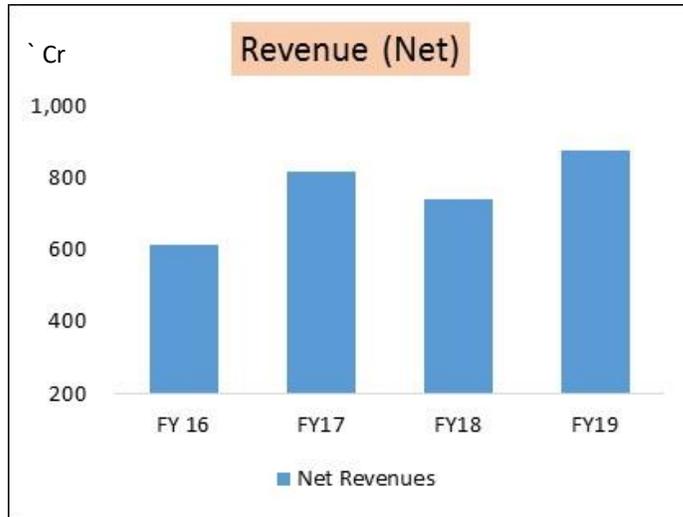

Benefits of India-based R&D;
4-times R&D for same cost as
compared to western peers

SG&A costs are half that of global
peers, while creating a large growth
potential

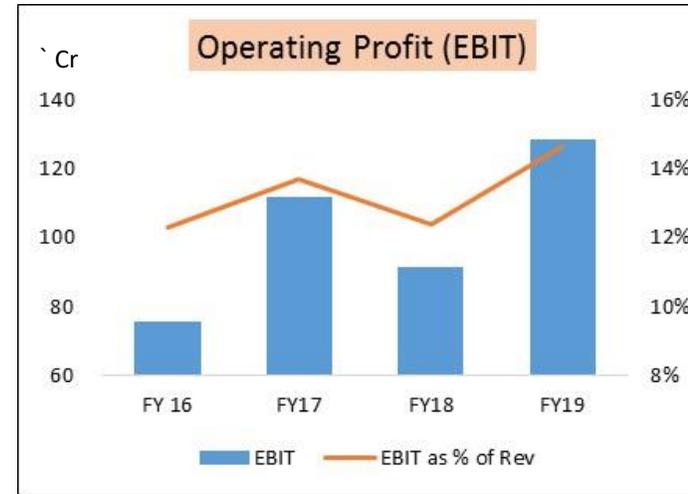

Growth, with profitability

* Delays in payment from one large Indian Government customer resulted in reduction of Cash and Cash equivalents and increase in Working capital days for FY 19

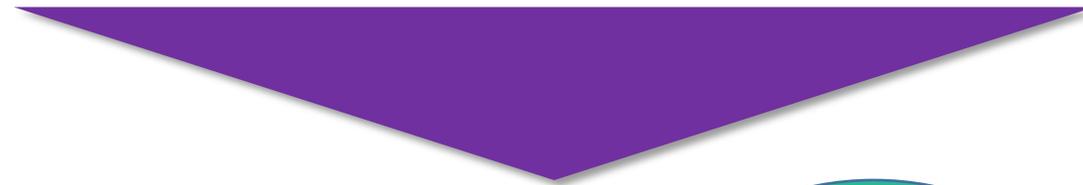

Technology Trends and Product Strategy

Long-term Technology Drivers

5G

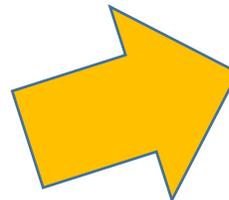

Leading to an Exponential Increase in Packet Traffic on Telecom Networks

Cloud and Data Centers

1.5ZB/yr
In 2017

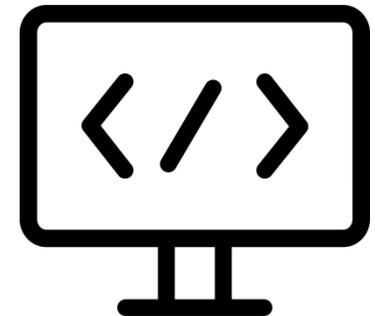

4.8ZB/yr
by 2022

Source: Cisco VNI Forecast, 2017-2022

IoT

SDN/NFV & Disaggregation

IoT: Internet of Things
SDN: Software Defined Networks
NFV: Network Function Virtualization

5G: Will drive a new Network Architecture

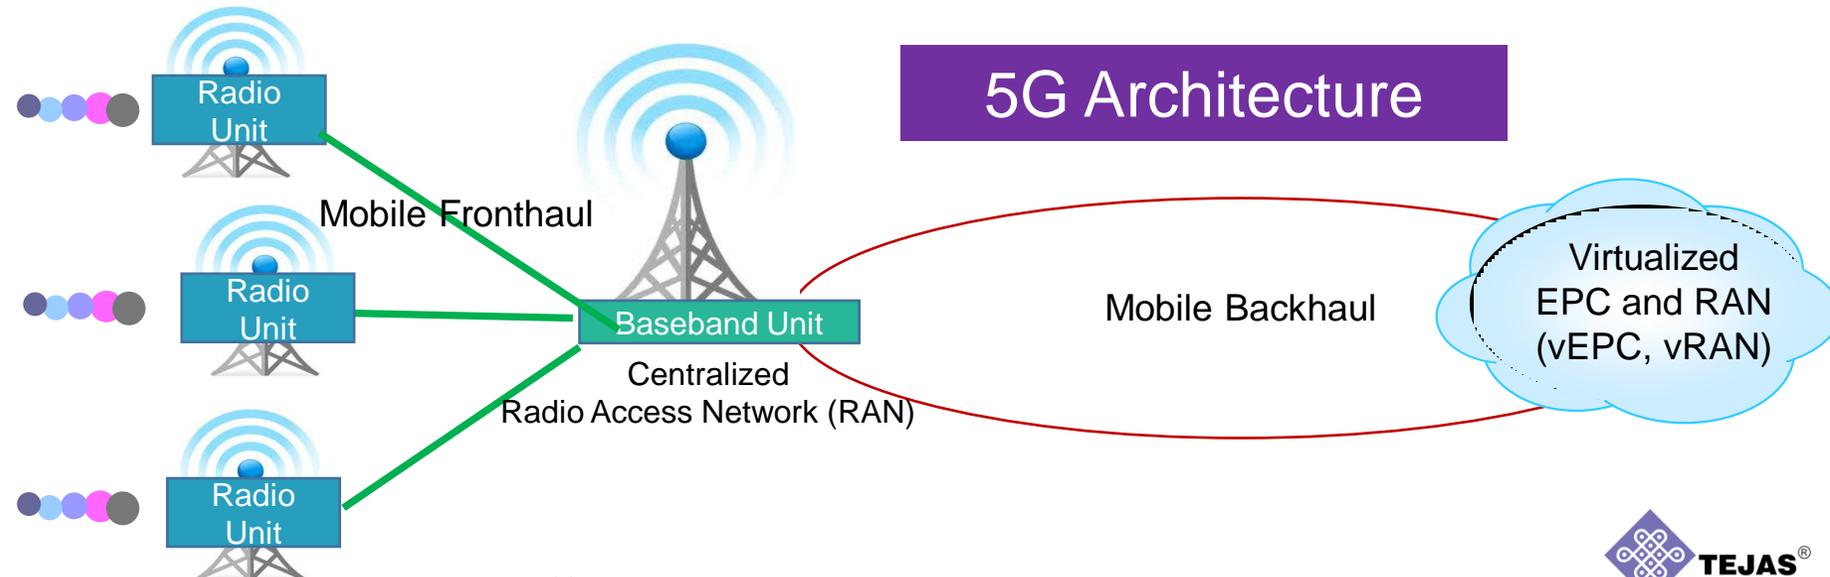

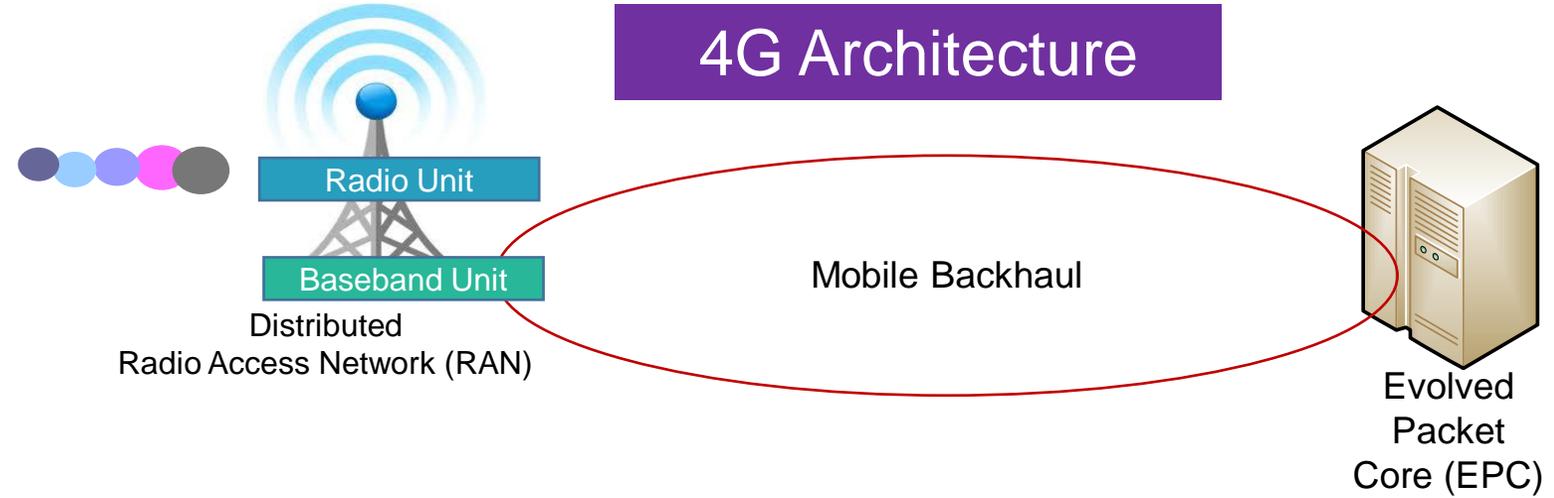

Peak Data Rate
20 Gbps

User Data Rate
100 Mbps

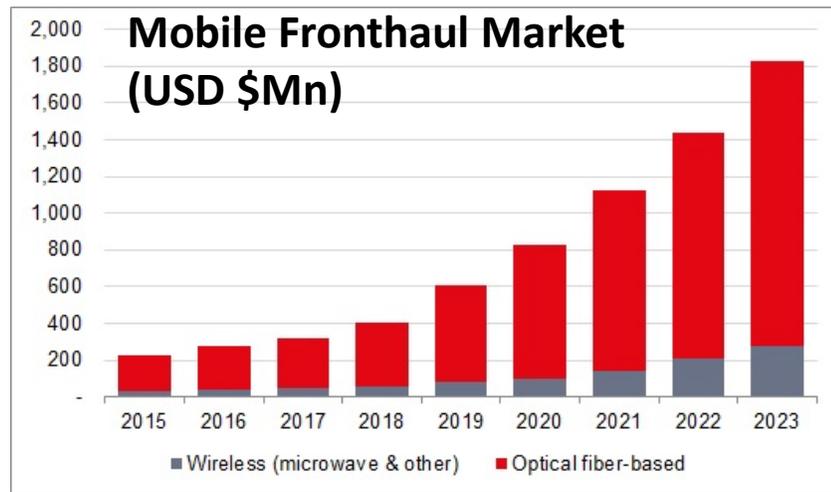

Latency
1-10 ms

Tower Density
10x (4G)

User Density
10x (4G)

Impact of 5G on our Business

Source: Ovum Reports

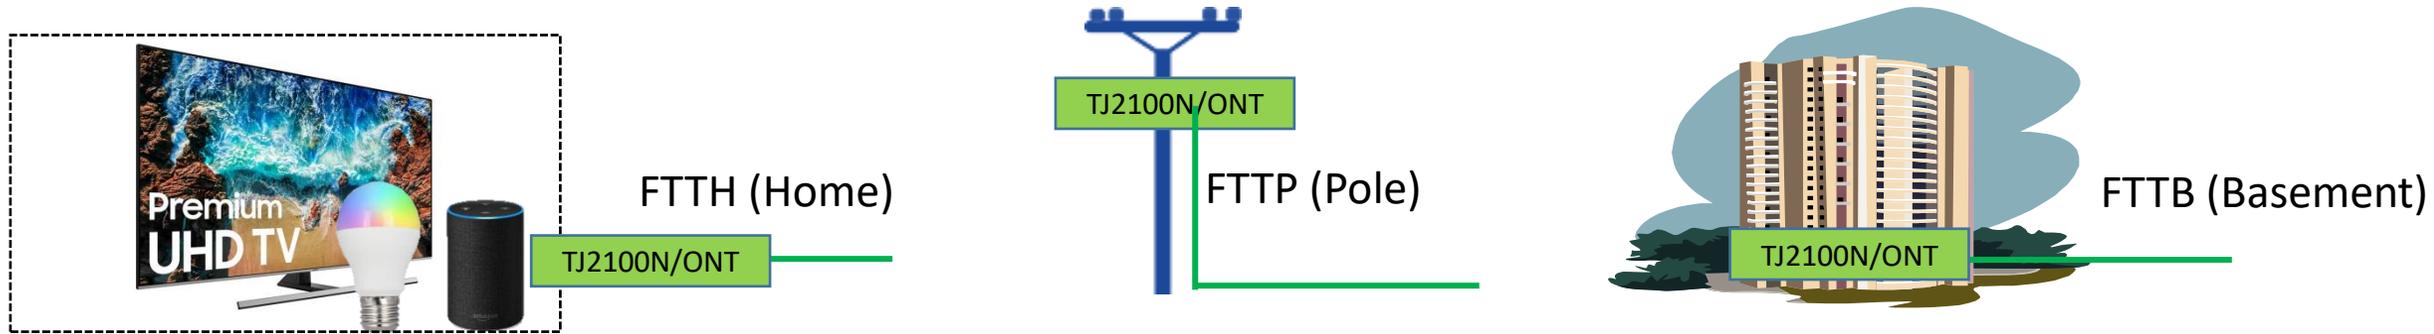

Mobile Backhaul/Fronthaul

- 5G will lead to “densification” of cell sites which will increase backhaul expenditure
- 5G speeds and latencies cannot be efficiently served by microwave; most towers will be fiberized
- 5G will add \$1.5 billion of optical fiber based “fronthaul” network component by 2023
- Cloudification leads to higher capacity links

Fixed Wireless Access (FWA)

- Fixed Wireless Access (FWA) emerging as a significant use case for 5G
- FWA will be used to deliver broadband services if fiber laying is difficult
- \$1.8 billion market by 2023 spanning both urban and rural markets
- With 5G, our addressable market for FWA will go up dramatically

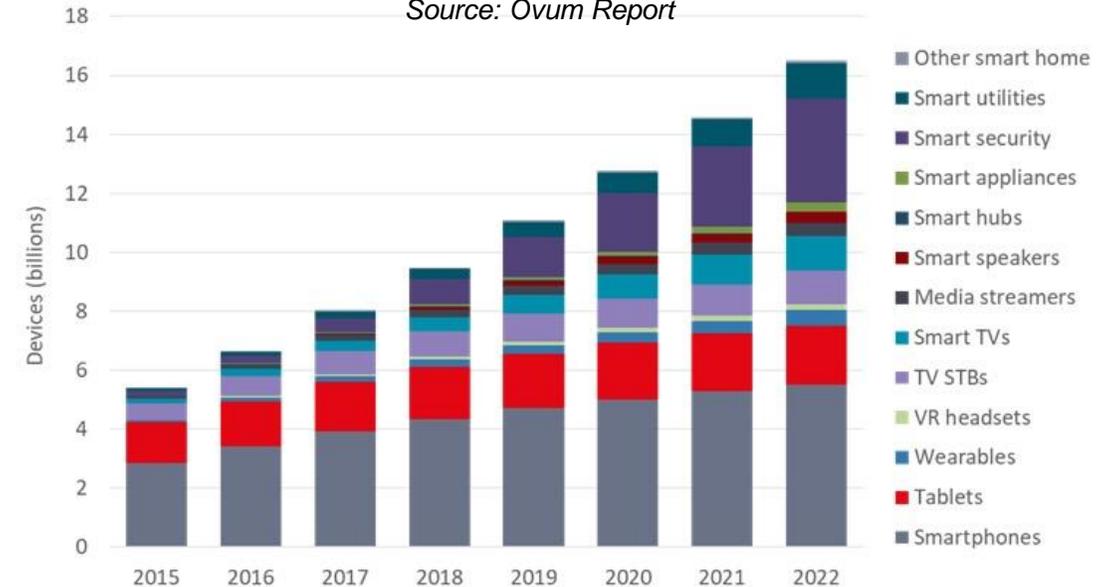

Impact of IoT on our Business

- IoT adoption will cause a massive influx of data traffic into telco networks; specialized IoT operators for enterprise-wide rollouts
- Copper (DSL) access services being replaced by Gigabit FTTH services for “Smart Homes”
 - Cable MSOs too adopting fiber-deep architectures preparing for IoT traffic deluge
- IoT will catalyze 5G investments; Asia will account for ~30% IoT revenues by 2025

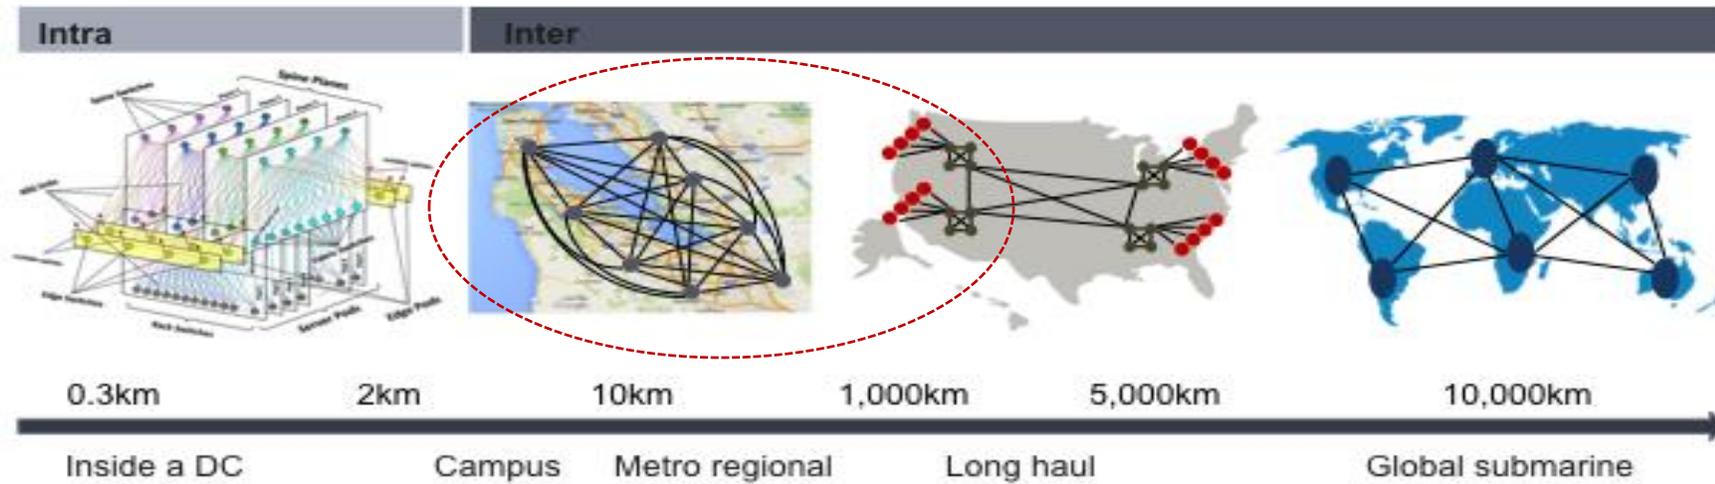

Global, connected consumer devices by type, 2015–2022

Source: Ovum Report

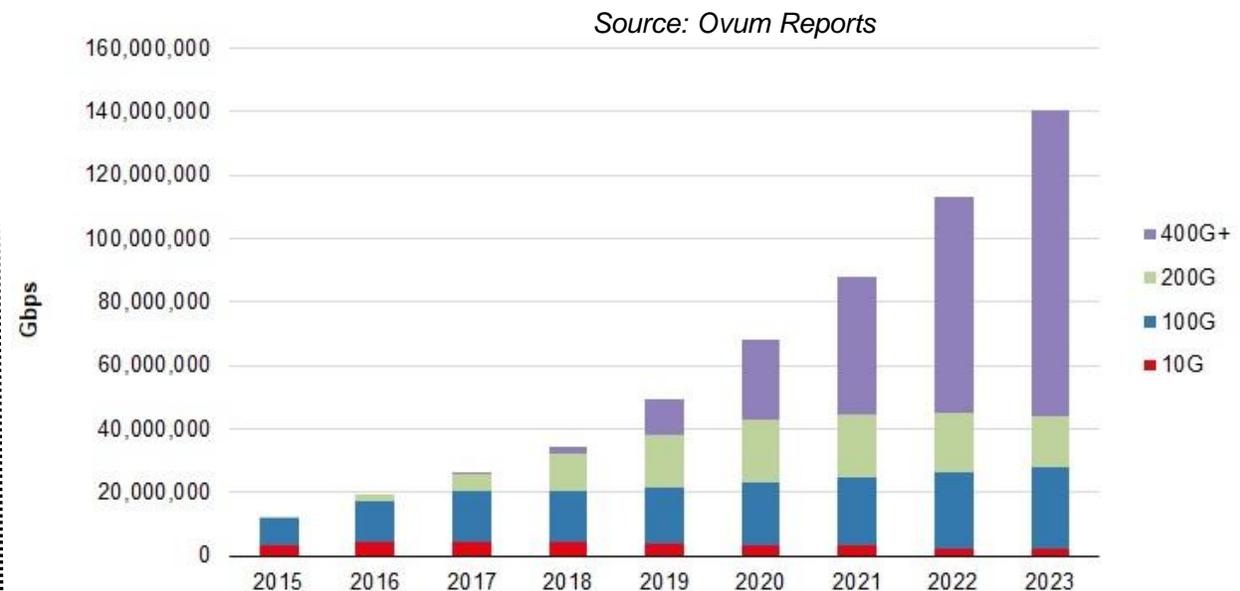

Smart Homes, Smart Cities, Smart Utilities will be lead applications

Impact of Cloud and Data Center Interconnect (DCI)

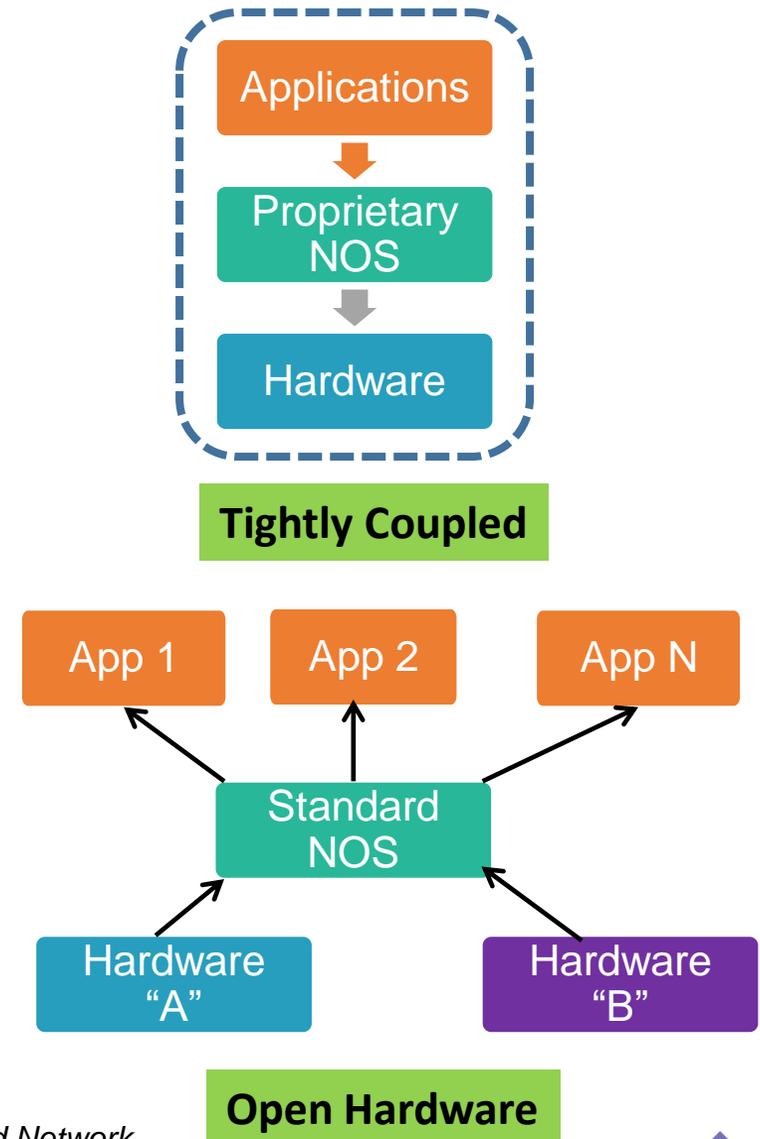

- Global market for Data Center Interconnectivity (DCI) projected to be \$7bn by 2021; 50% in emerging markets
- Exponential increase in demand for DWDM and 100G+ (200G/400G/600G) wavelengths for DCI
- \$1bn market for purpose-built DCI products optimized for interface density, size and power
- Market opportunities in both captive (led by web companies) and wholesale (carrier-led) networks

Impact of SDN/NFV/Disaggregation on our Business

- SDN: Programmable telecom networks with an “app-like” service deployment experience
- NFV: Virtualization of specialized hardware functions in general purpose servers
 - Both at Access (vCPE) and Aggregation (VNF)
- Disaggregation: Hardware-Software decoupled resulting in better innovation
- Key Benefits
 - Greater Service Agility, Lower Network Opex, New Service Opportunities, Reduce Vendor Lock-in
 - Lower Hardware Capex (Standardized) & Software Capex (Open Source)
- Well positioned to benefit from this trend due to software-defined hardware™ architecture
- Disaggregation promotes “best-of-breed” procurement approaches by service providers
 - Enables new vendors like Tejas to potentially break into incumbent accounts through innovative products

SDN: Software Defined Network
NFV: Network Function Virtualization
VNF: Virtualized Network Function

Maintaining Technology Leadership

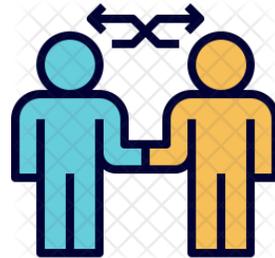

Active participation in national and international standards bodies

Generating and protecting in-house IPR by filing patent claims worldwide

Close collaboration with customers to understand their network requirements

Establishing thought leadership at international conferences

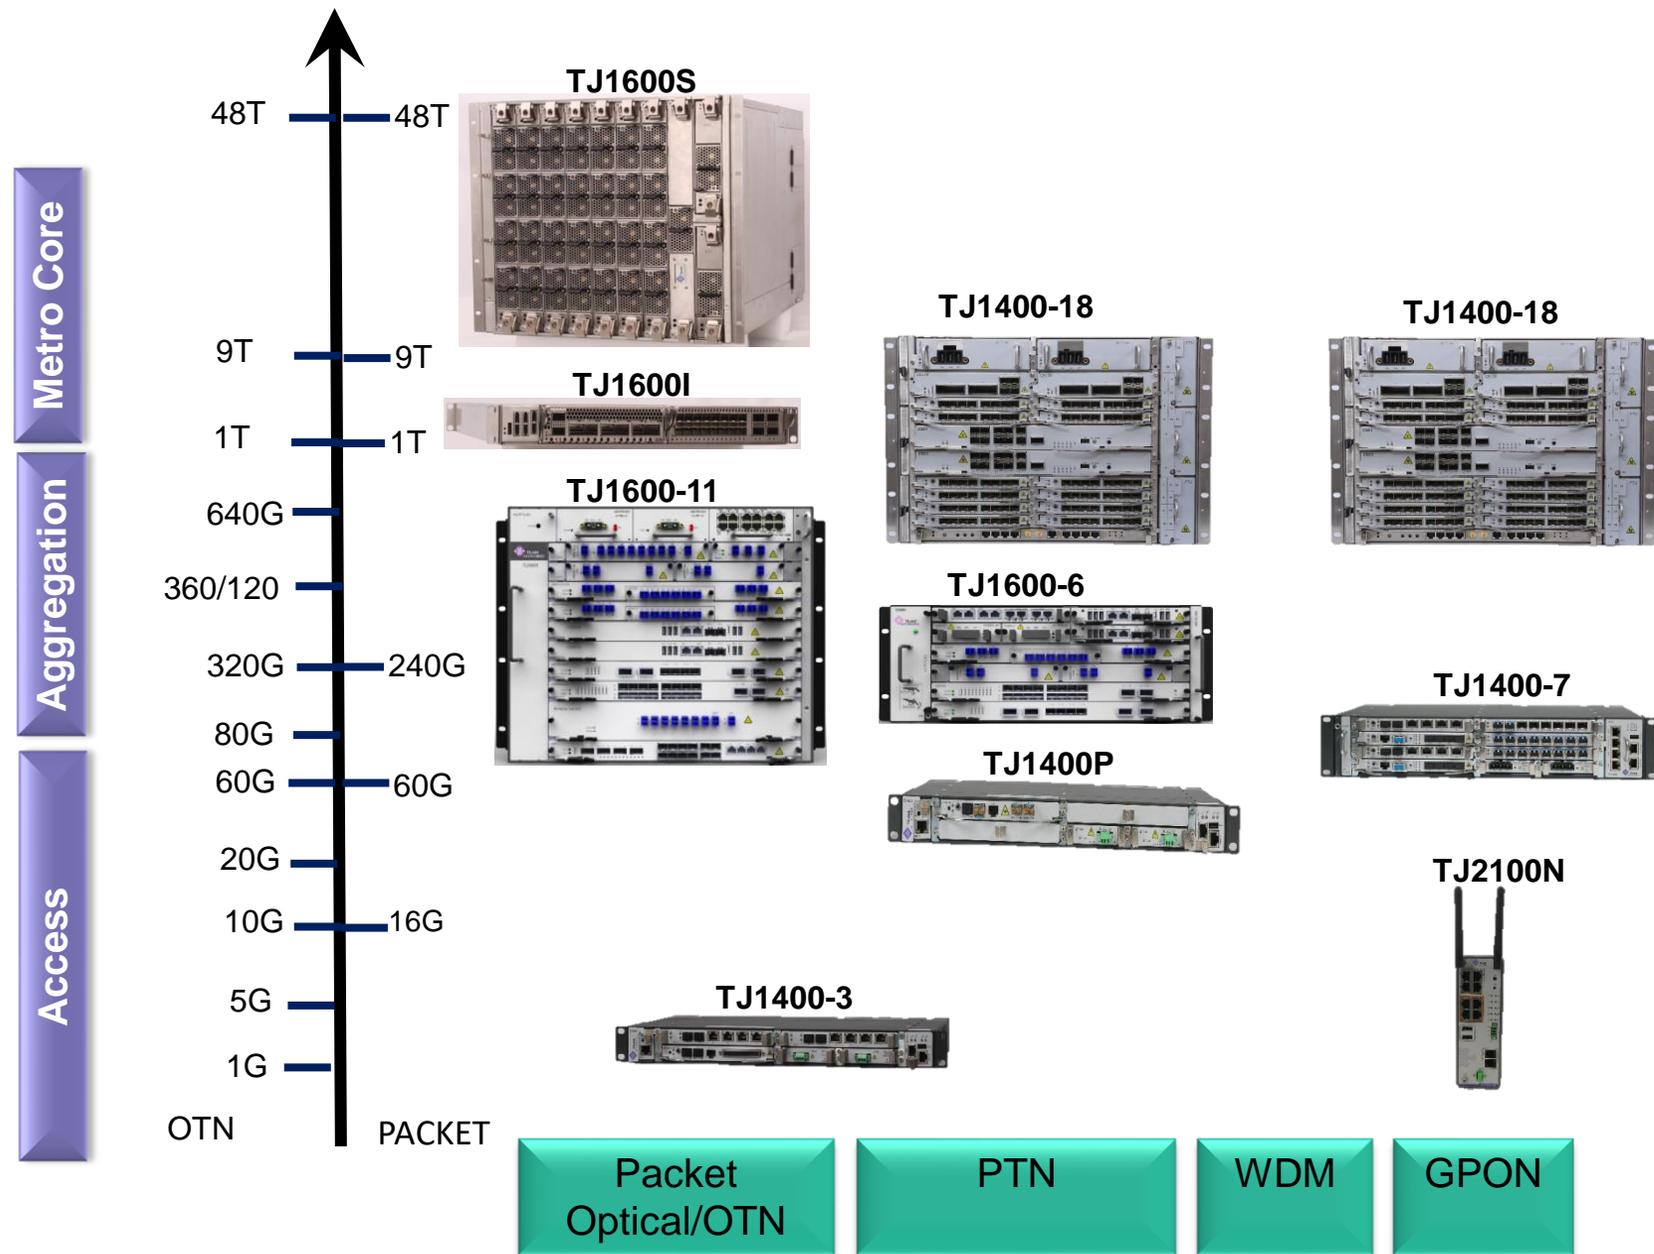

Aligning Product Roadmap with Evolving Technology and Market Requirements

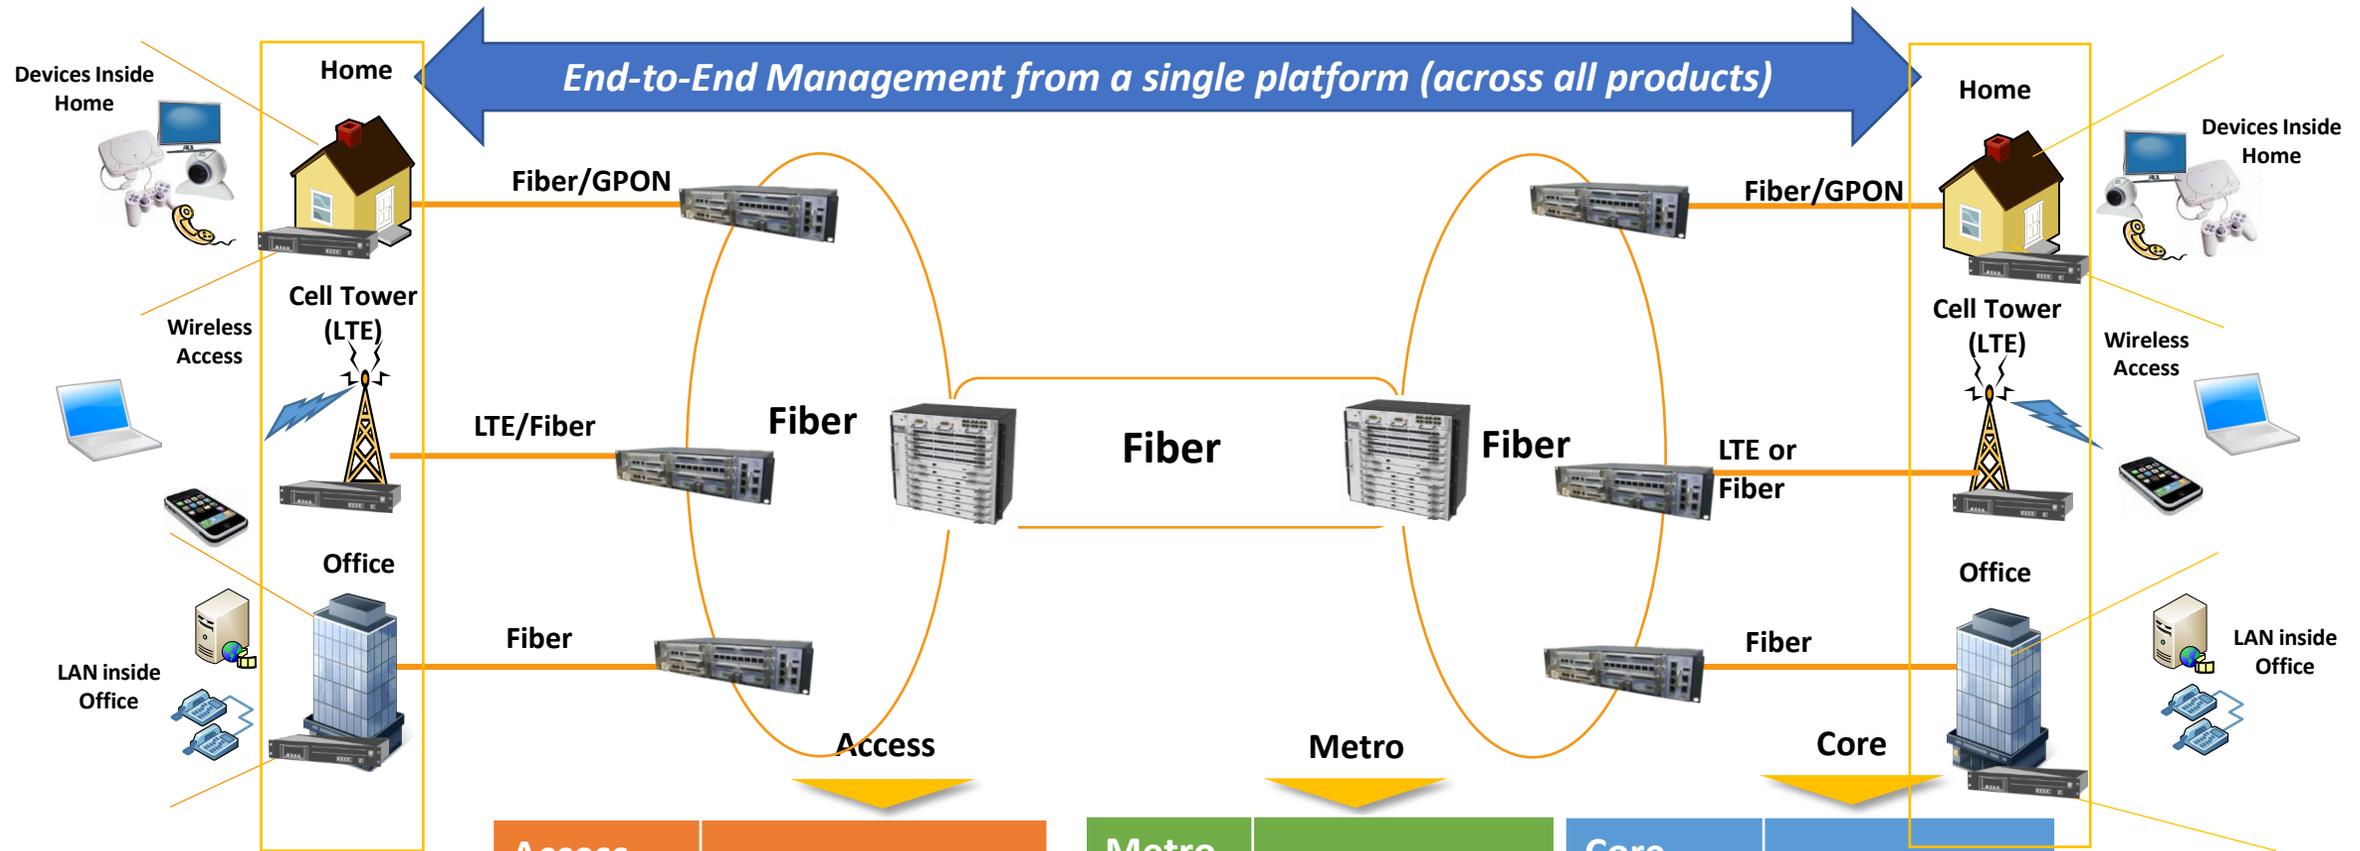

Products and Applications

Comprehensive Optical Product Portfolio

Our Product Focus : from Access to Metro Core

Access	
Speeds	Nx10G => 100G
Tech	PTN, SDH, GPON, LTE
Products	TJ1400, TJ1600-2

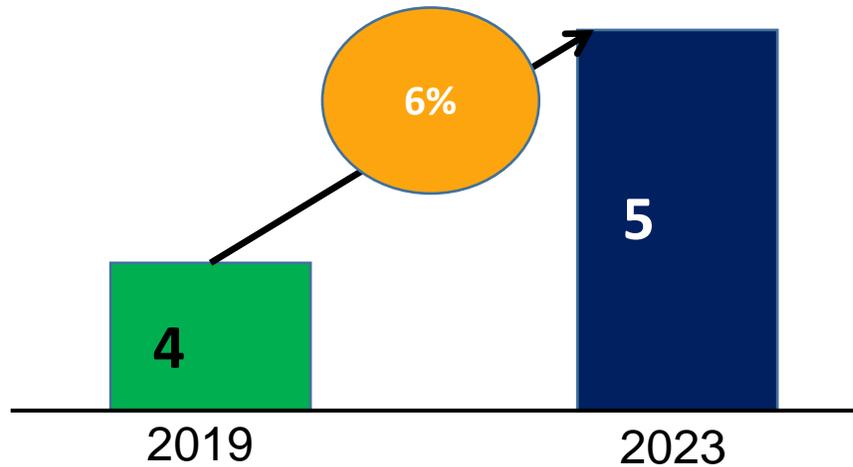

Metro	
Speeds	100G => Nx100G
Tech	DWDM, OTN, PTN
Products	TJ1400-7, TJ1600

Core	
Speeds	Nx100G => 400G
Tech	ROADM, OTN, SDN
Products	TJ1600, TJ1400-18

Network Applications Where We Win

Why We Win

Optimized Networks for Converged Services

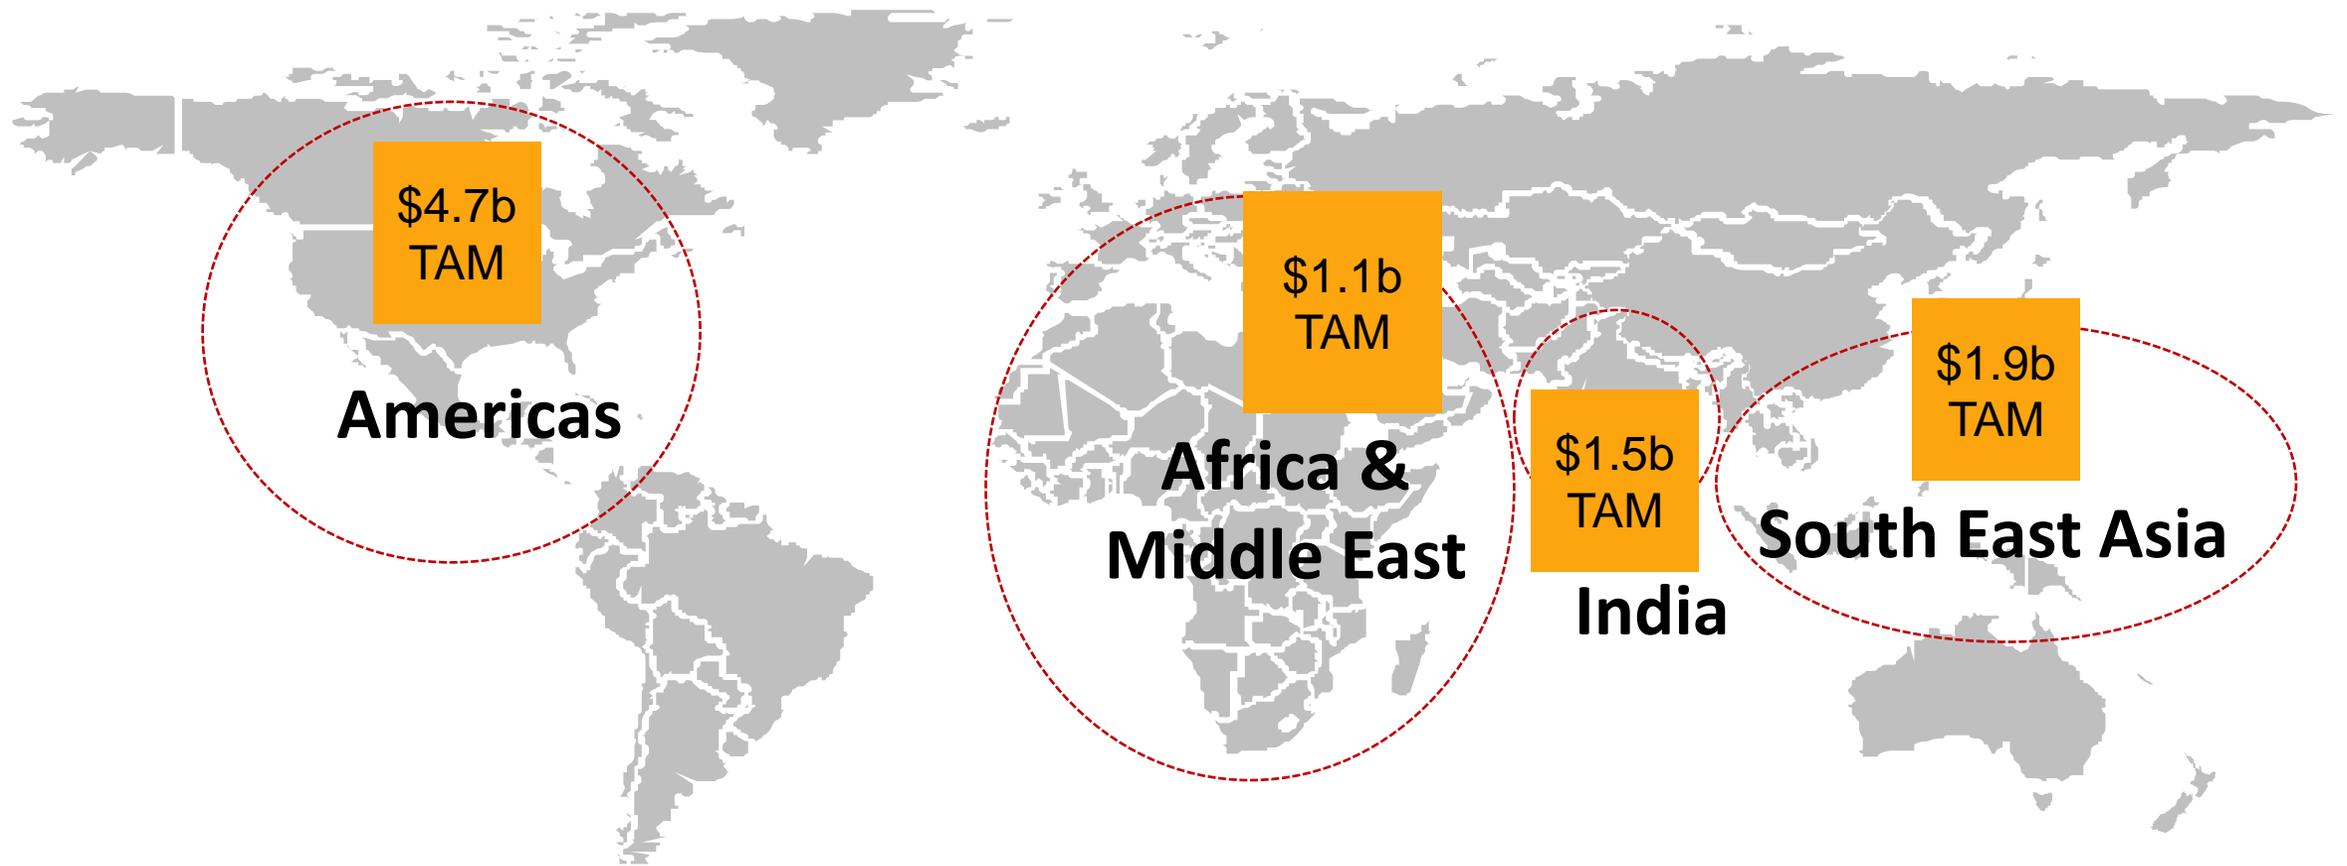

Technology & Products: Key Takeaways

- Strong consumer/enterprise demand for high-bandwidth content driving unprecedented growth in global data traffic
- Key technology trends that have a favorable impact on our business
 - 5G, IoT, Cloud and Data Center, SDN/NFV and Disaggregation
- Programmable software-defined hardware™ architecture gives us a competitive edge
 - Ultra converged access/edge, Multi-Terabit Optical switching, Multi-generation technology
- Differentiated features for high potential network application wins
 - Mobile Backhaul/Fronthaul, Wholesale Bandwidth, Network Modernization, Critical Infrastructure, Enterprise Services, Broadband Access
- Strong technology team, influencing/tracking new standards, driving innovation and aligning product roadmap with market needs

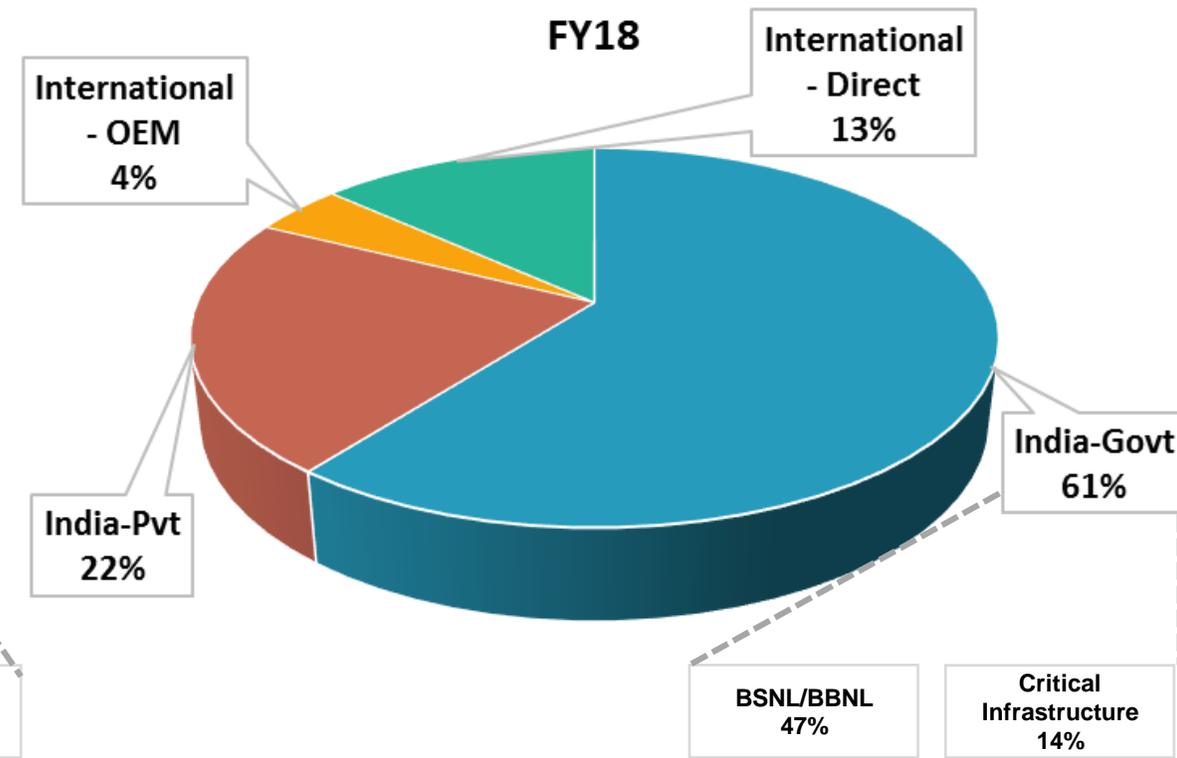

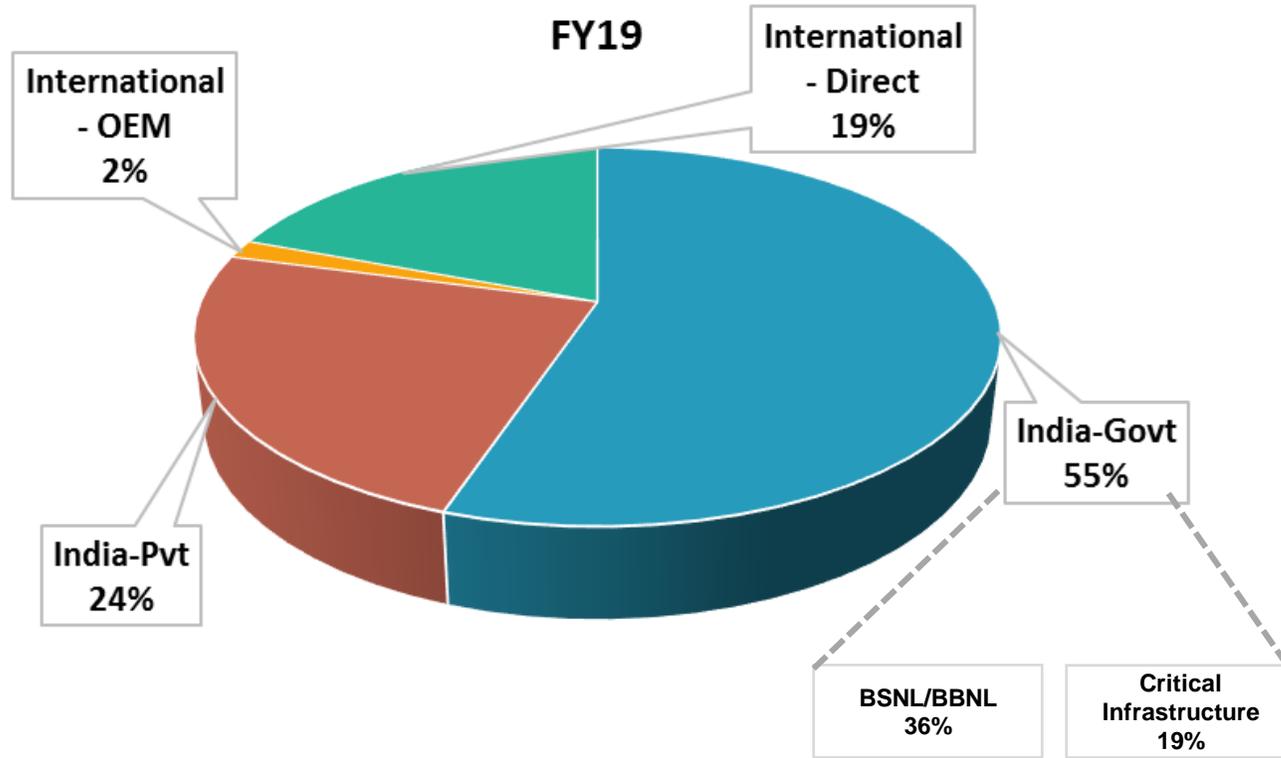

Sales Strategy

Our Sales Focus: High-growth geographies

Total Addressable Market (TAM) of ~\$9 billion

Revenue By Segments

Increased International Direct YoY growth 70%

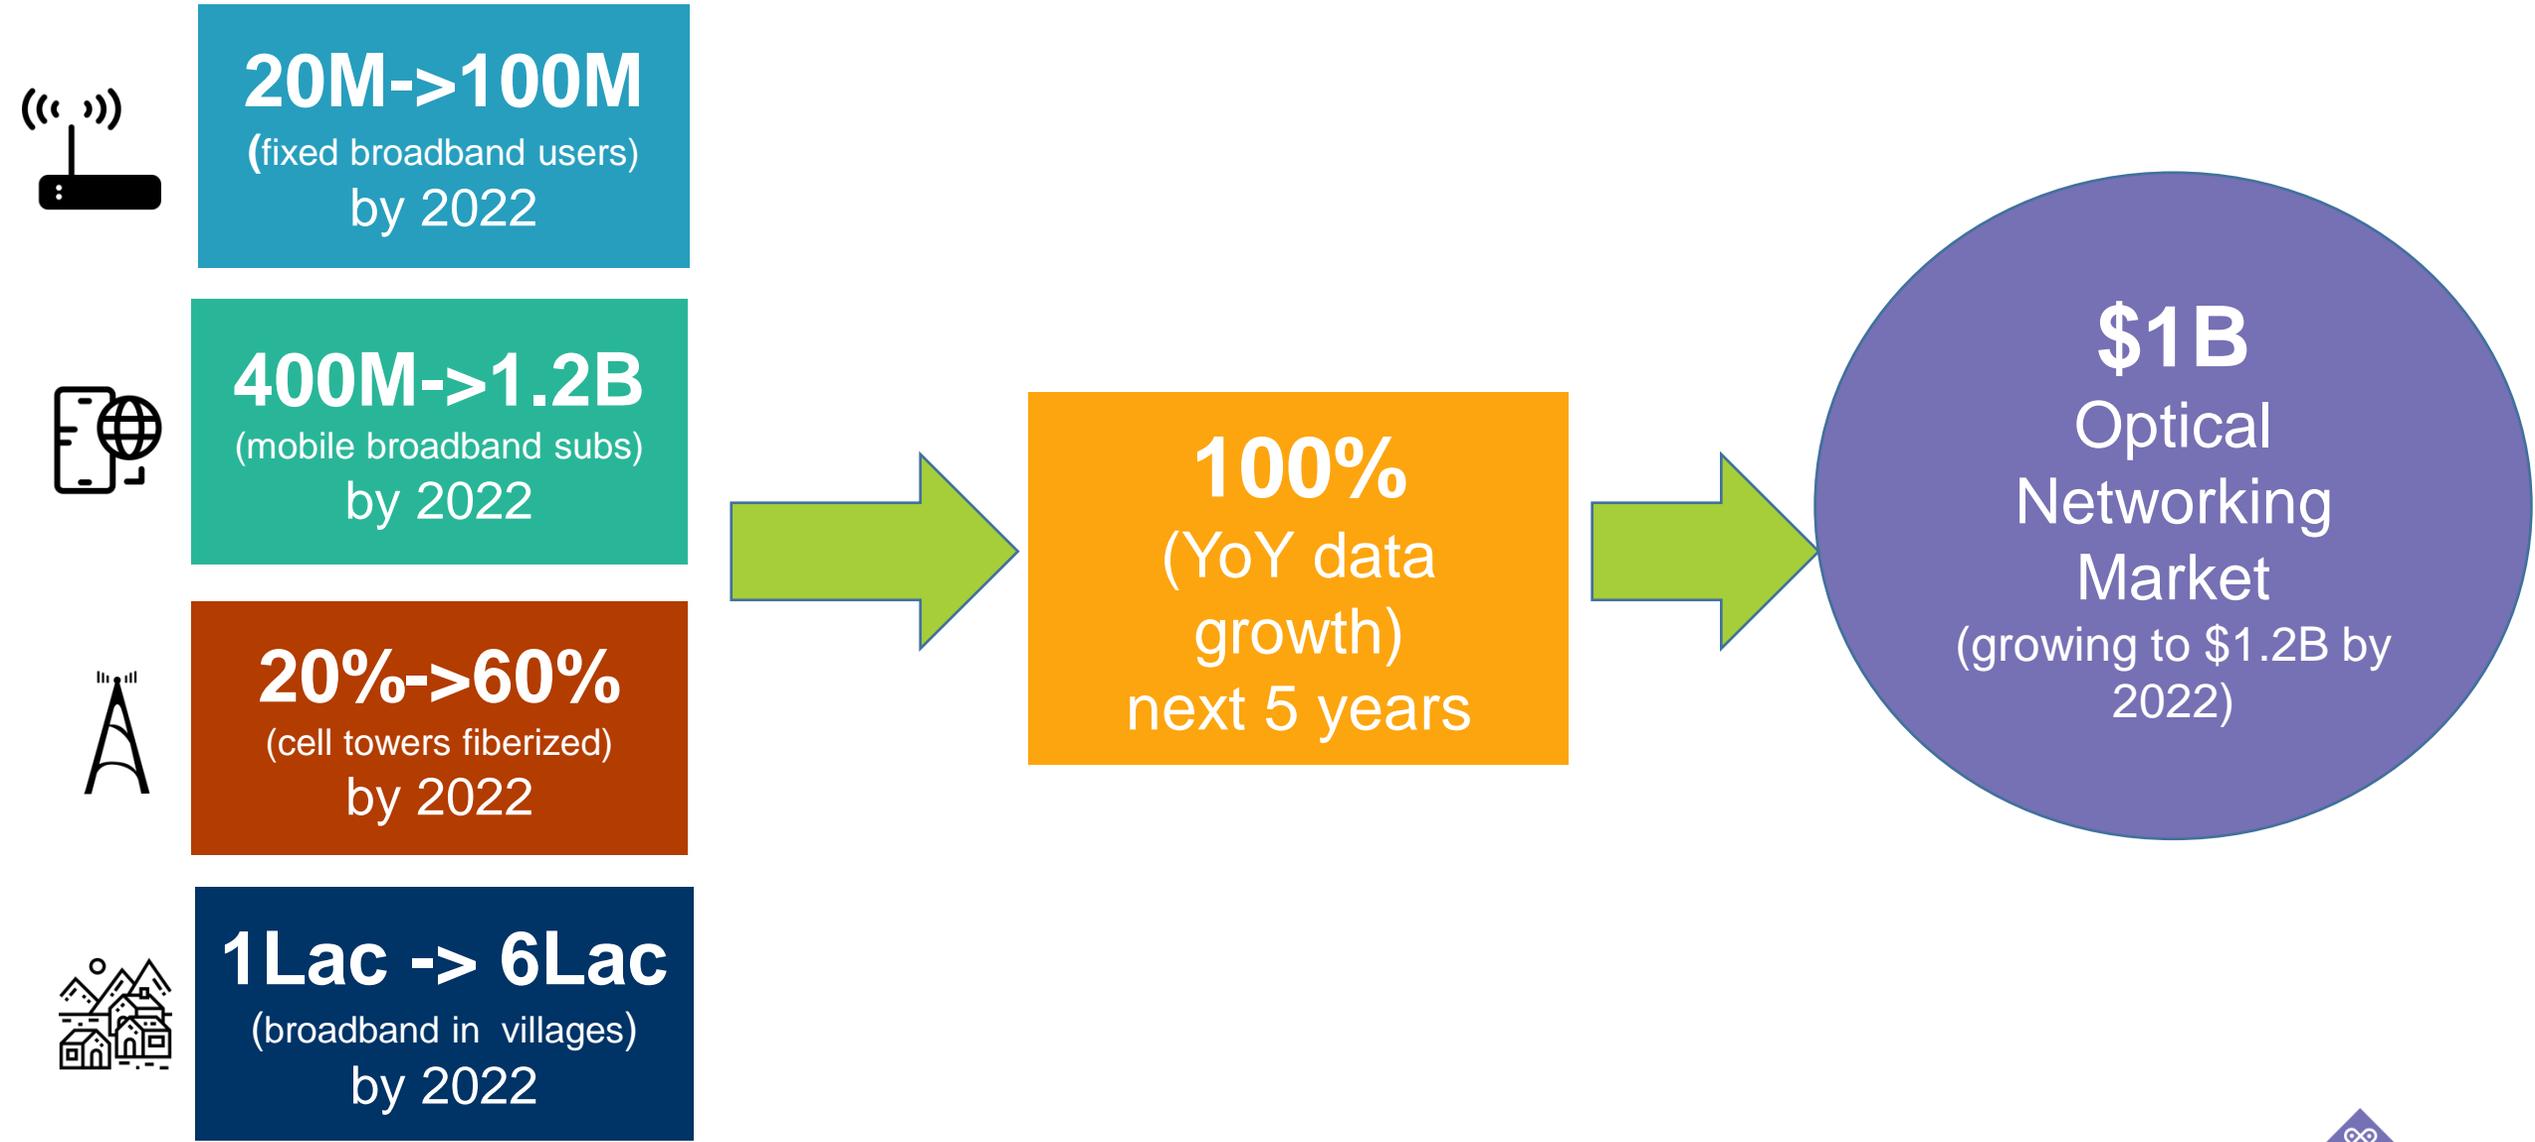

Continued growth in India Private YoY growth 28%

Reduced dependency on India Govt. YoY growth 7%

FY 19
Net Revenue
grew by 18.5%

India: Data and Broadband Growth to Continue

India Business- Growth Drivers

Private

- Increased fiberization of cell towers is required to cater to growing mobile data demand
- Cloud/Datacenter demanding higher bandwidth due to exploding video traffic, e-commerce and web usage
- Residential Broadband (FTTX) is an untapped market and will be key growth driver
- 4G investments will continue for next 2-3 years; Large 5G rollouts will start after 2 years

Government-Critical Infrastructure

- Robust, high-capacity telecom infrastructure is essential for Utility companies (power, rail, oil & gas, metro), defense, security
- Captive Networks are being upgraded for automatic control systems, video surveillance, high-speed Internet, smart grids etc.
- Utility companies are also selling wholesale bandwidth as Carrier of Carriers– Railtel, PowerTel
- Steady growth in this segment to continue over medium term

Government-Telco & USO

- Multiple USOF opportunities
 - BharatNet Phase 2 – Central
 - BharatNet Phase 2 – States
 - BharatNet – WiFi to Villages
 - LWE (Left Wing Extremist) & other remote networks
 - Augmentation of Intra-district Capacity in N.E
- BSNL/MTNL need to upgrade their optical infrastructure- capex plans identified but on hold
- Govt's focus on Design and Make-in-India to achieve "Net Zero" imports of telecom equipment over next 5 years

Sales Outlook: India

Private

- Our incumbency, pan-India support, local manufacturing and deep relationships with operators enables us to deliver right-sized products to cater to their needs
- Channel partnerships for securing enterprise and captive network business.
- We are expanding wallet share through new application wins
 - FTTx based on GPON
 - Metro capacity upgrades: on OTN/DWDM
 - Enterprise data services
- Healthy growth expected

Government-Critical Infra.

- Dominant marketshare in this sector with a strong track record
- Strong product fit- we seamlessly modernize legacy networks
- Strong partnerships with local System Integrators who execute turnkey projects
- Preference to Make in India (PMI) as well as security-sensitivity, benefits domestic manufacturers
- We see steady run-rate growth across large number of customers in FY20

Government-Telco & USO

- Favorable policies such as Preference to Make in India (PMI)
- Focus to promote domestic design-led manufacturing in NDCP and by TRAI
- We expect to see clarity on USO funded projects as well as BSNL's capex plans post Q2
- Revenues from this segment will continue to be lumpy

Sales Outlook: South and South East Asia

Opportunity

- Targeted countries:
 - Bangladesh, Sri Lanka, Bhutan, Malaysia, Vietnam, Cambodia, Indonesia, Philippines, Myanmar, Mongolia
 - 100+ telecom service providers in this region
- Strong demand for optical networking equipment: Total Addressable Market of ~\$1.9b in target countries; expected to grow to ~\$2.4b by 2023
- BIMSTEC/ASEAN is a focus area for Indian-Govt's telecom exports; Line-of-credit are available
- Mobile internet users in Southeast Asia spend considerably more time on Internet than global peers
- Over 300 million super-broadband subscribers (> 100 million) by 2023

Outlook

- We have established strong customer references in the region. Customer Profile (by FY19 revenues):
 - Up to 1 Cr : 24
 - 1-15 Cr : 4
 - Above 15 Cr : 1
- Credible alternative for customers looking to diversify their vendor base, beyond Chinese
- We have very good product-fit for market needs:
 - Ultra-converged platform integrating FTTx, WTTx, PTN and OTN in one shelf
 - Universal backhaul from 2G/3G to 4G/5G
- Continuing to Increase regional sales investment
 - Strong local presence in Malaysia, Bangladesh, Sri Lanka, Singapore, Vietnam
- Expect first success in FY20 for G-to-G project
- Good customer traction and active engagement should result in a strong YoY growth in FY20

Sales Outlook: Africa and Middle East

Opportunity

- Focus for Africa- all regions
 - South Africa, Nigeria, Ghana, Kenya, Burundi, Uganda, Rwanda, Algeria, Ghana, Morocco
- Focus countries in Mid-east
 - Oman, Egypt, Saudi, Afghanistan, Qatar
- Total Addressable Market of ~\$1.1b in target countries expected to grow to ~\$1.3b by 2023
 - 200+ telecom service providers in the region; over 1 billion telecom subscriptions
- Providing high-speed broadband is a top priority for all governments in developing countries
- Private telcos are expanding from mobile networks to data networks. Also inducting new vendors to reduce their supplier concentration risk
 - Significant pent-up demand for fixed broadband which is currently low at 2.6 million; fixed LTE accounts for 21% of these subscriptions and 50% of data usage
 - Super-broadband subscriptions to grow at 38% CAGR

Outlook

- Strong customer references: FY19 Customer Profile
 - Up to 1 Cr : 32
 - 1-15 Cr : 8
 - Above 15 Cr : 1
- We Increased sales investment in the region by 23% YoY in FY19. Continuing to add resources
 - Local presence in South Africa, Kenya, Nigeria, Dubai, Algeria, Oman
 - Got selected by 4 new Tier-1 operators (some are pan-African) and 15 new customers
- Application where we are winning:
 - Alien wavelength: 100G/200G interoperable with multiple, existing DWDM vendors
 - Ultra-converged broadband access/edge
- Good customer funnel and engagements with multiple pan-African, Tier-1 operators should result in a strong YoY growth in FY20

Sales Outlook: North America

Opportunity

- Targeting customers
 - USA- Tier 2 and Tier-3 operators and cable companies
 - Mexico- all operators
- Total Addressable Market of ~\$4.7b in target countries expected to reach ~\$5.7b by 2023
 - 450+ telecom service providers distributed across
 - Strong demand for superfast broadband (>100 Mbps) with ~10% of subscribers to have Gigabit access over fiber by 2022
 - New buildout cycle with 5G has started; more fiberization
- In USA- there are trade barriers for Chinese vendors. We have product cost advantage as well
- Product Fit:
 - High-capacity circuit emulation for Network Modernization
 - Ultra-converged broadband access/edge
 - Feature-rich Metro WDM/OTN products

Outlook

- America-direct business grew well, driven primarily by success in Mexico. OEM business has shrunk and is unlikely to grow in future
- Added 11 new customers including one Tier-1. Customer Profile (by revenues)
 - Up to 1 Cr : 15
 - 1-15 Cr : 5
 - Above 15 Cr : 1
- Increased sales investment by 21% YoY in FY19. Will continue to add resources in FY20
 - Local office in Mexico where we have strong customer reference and successes
 - Increasing sales teams in USA
- In FY20, Mexico is expected to show strong growth with business from existing customers. In USA, we expect new customer wins and strong revenue growth, based on several active customer engagements

Sales Outlook: Key Takeaways

- Our focus is to increase our run-rate customer business as well as international
 - Drive growth in International-direct, India-private business
- Sales Investments in International-Direct expected to deliver strong growth
 - Many new customer wins, including several Tier-1 customer wins in FY19 provides us a strong foundation for growth
 - Each of the 3 regions: South/SE Asia, Africa/Mid-east and America expected to deliver robust growth in FY20, based on existing wins and strong new customer engagements
 - International revenues expected to reach nearly 50% of total in 3 years
- India business will continue to see solid growth
 - Winning new applications in India-Private accounts
 - Critical Infrastructure business (Power, Rail, Oil & Gas, defense) has strong run-rate trend
 - India-Government (BSNL/USO) business is lumpy, but has large potential, with specific broadband projects lined up for execution

Supply Chain Management

Asset-Light Mfg. with Focus on High Value Addition

TEJAS

Product Idea & Innovation

- Betting on the right technology and standards features
- Innovative product design and architecture

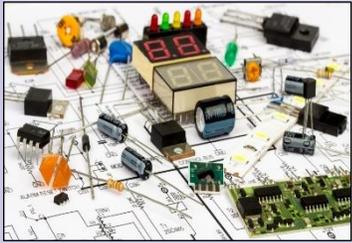

30~65 %

R&D, Product Design (System + HW + SW)

- Creation of IPR (Product IPR; Patents)
- System design; Hardware, SW, FPGA/Silicon, Mechanics
- Product design, development, testing/verification

TEJAS + EMS

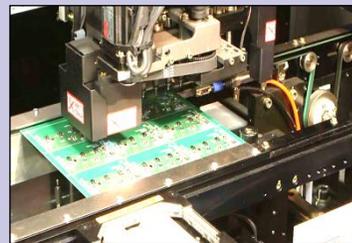

Components

- Silicon components , Discrete
- Bare PCBs, Mechanicals, Cable Assemblies
- Passive components, Electro-mechanicals

30~50%

EMS

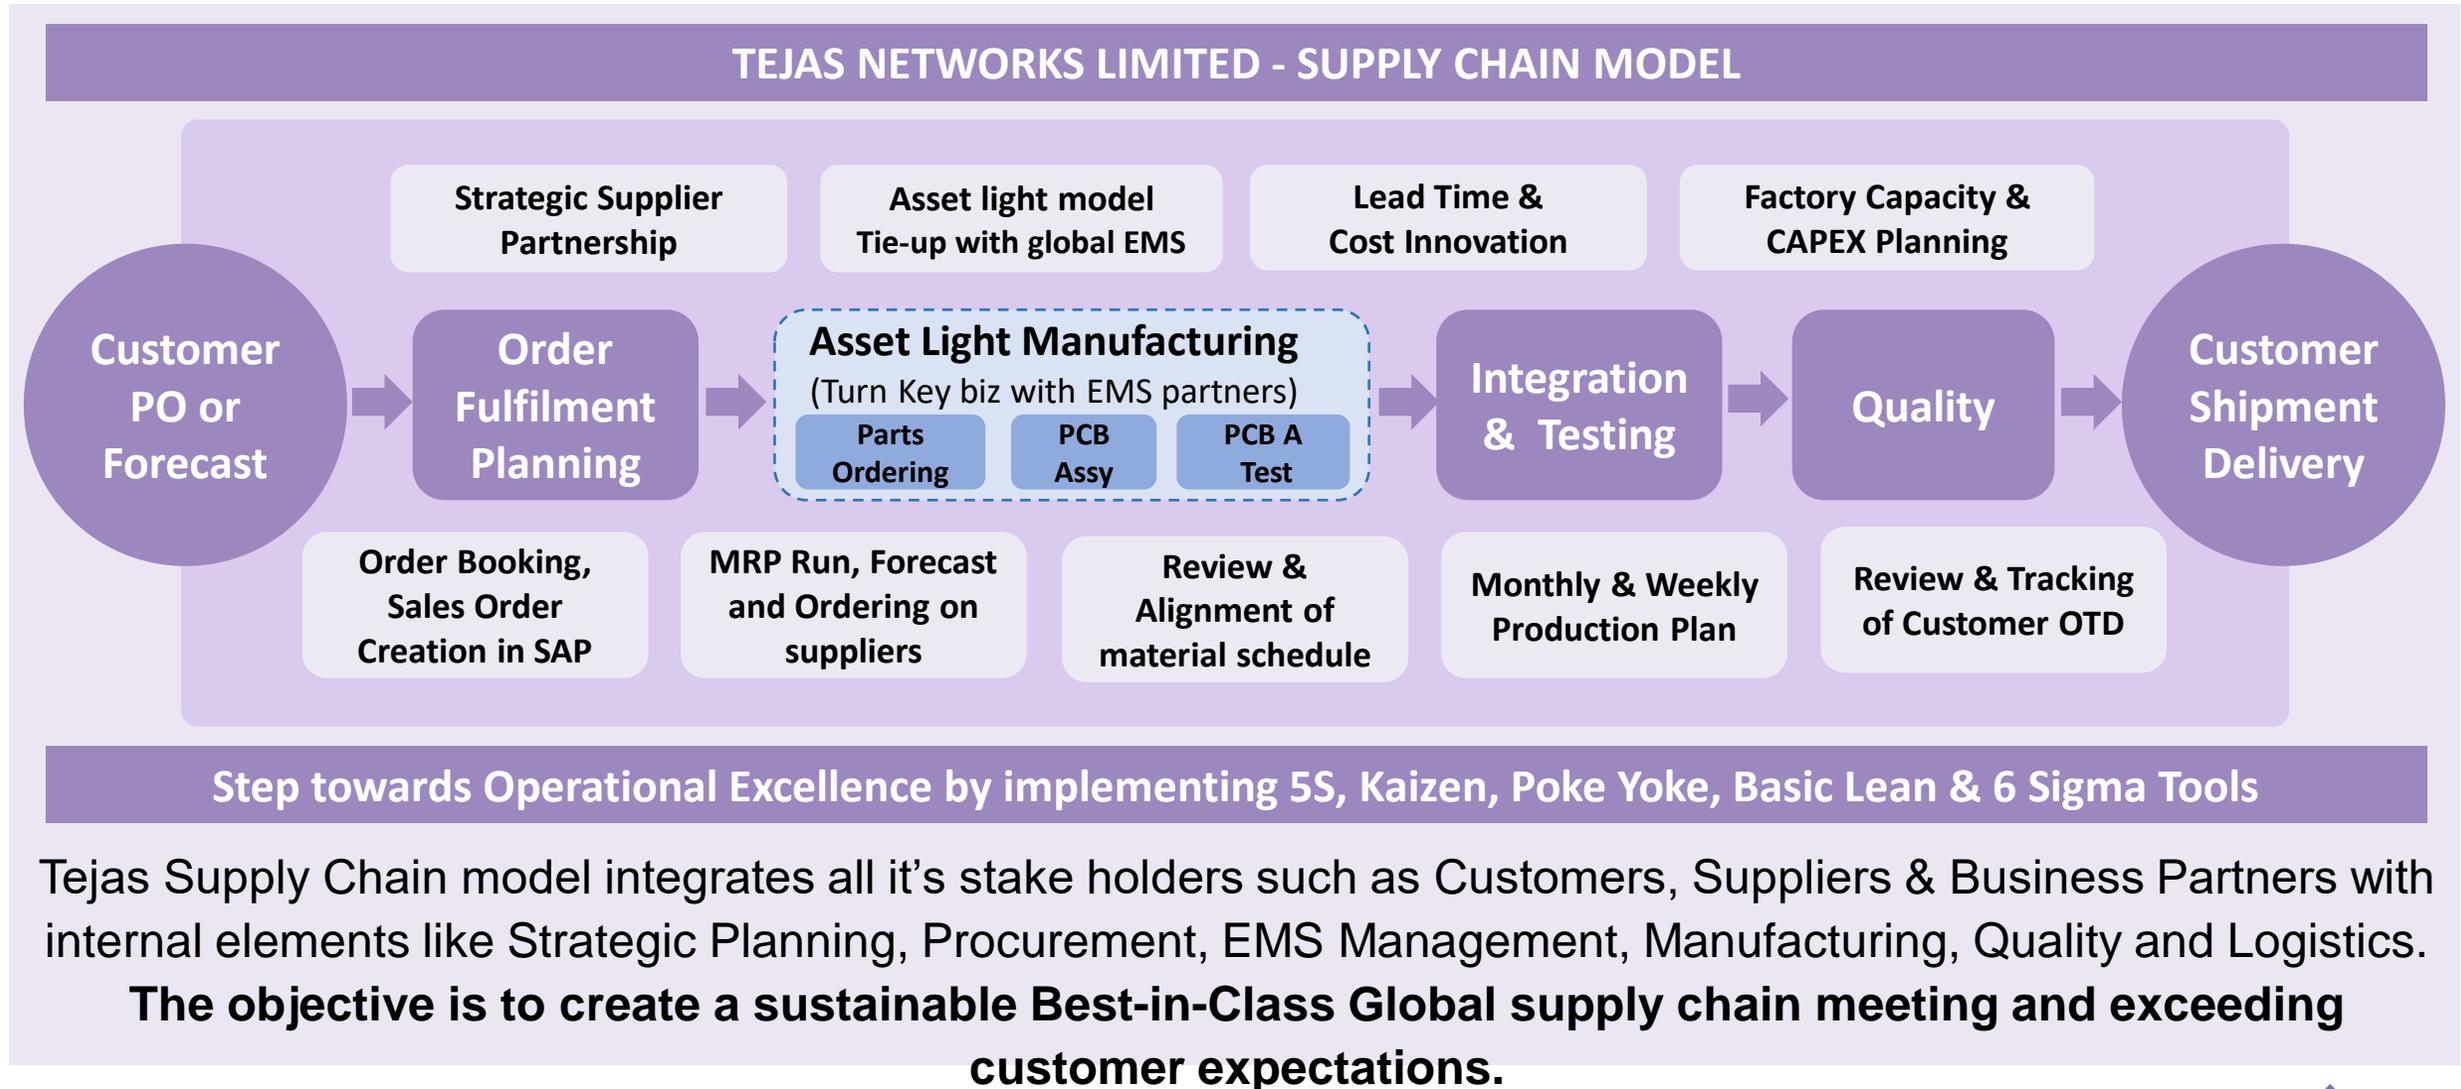

Manufacturing (SMT), Assembly & Testing

- Board Stuffing, SMT : done by EMS
- Testing, Final Assembly and Quality Assurance
- Logistics, Packing and Shipping out of Tejas Factory

5~20%

Tejas Supply Chain Model

Tejas Manufacturing Facility in Bangalore

- State of the art Integration & Testing facility with 72000 sq. ft. built up area at electronics City phase II , Bangalore
- Dedicated shop floors for Export (EHTP) and Domestic (DTA) sales.
- 70+ Highly skilled and motivated employees augmented by flexible resources support to manage peaks.
- ESD compliance, including elevated Temperature testing chambers to ensure high Quality of our products.
- 18000 Sq. Ft of warehouse space for Components, Assemblies & FG

Quality Excellence @ Tejas

ISO 9001 & TL9000 certified company with prime focus on Product Quality and achieving Customer Satisfaction.

Quality Highlights:

- Customer network uptime 99.999%
- RITS (Return in time of Service) 0.29%
- FQA (Final QA) Yield 99.5%

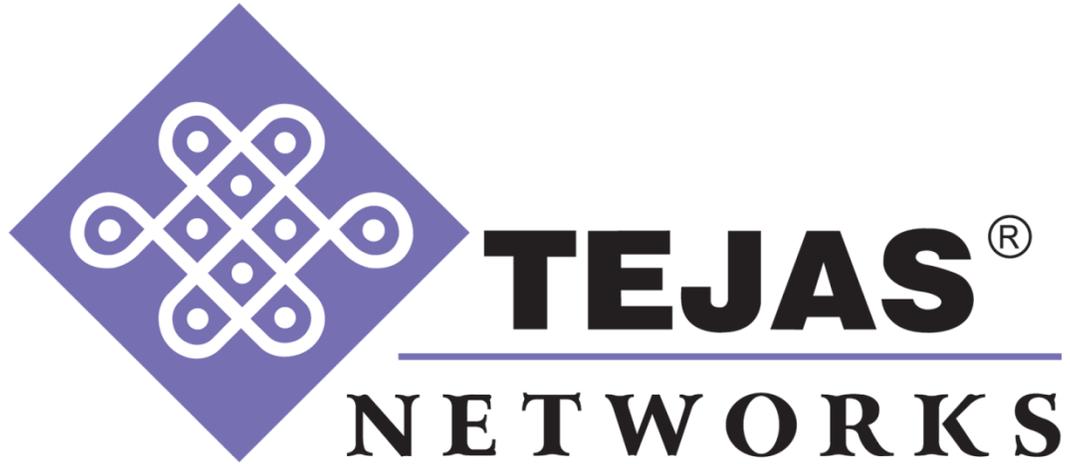

ISO9001 , TL 9000 Certifications

Key Takeaways

- Data growth trend continues to be a favorable driver for our business in India and International
 - Strong growth in data usage, broadband, cloud, data center and fiberization are driving optical investments
 - Fixed wireless applications will increase with 5G
- Sustained R&D investments expanding our addressable market and competitiveness
 - We continue to invest aggressively in R&D and IPR creation
 - We have a very competitive product portfolio from Access to Metro core
 - We are getting global recognition and international customer success with our products
- Sales focus is to increase run-rate business and international
 - Drive growth in International-direct, India-private
- Sales Investments in International-Direct starting to show results
 - Many new customer wins including several Tier-1 customers in our target countries
 - We will continue to increase our international sales and marketing investments
- India business continues to see steady growth
 - Winning new applications in India-Private
 - Critical Infrastructure business (Power, Rail, Oil & Gas, defense) in India showing strong run-rate trend
 - India-Government (BSNL/Bharatnet) business is lumpy, but has good funnel, based on projects that are lined up
- We have a proven financial model of delivering growth, while maintaining profitability
